Progress in Solar Engineering D. Yogi Goswami, 1987 A Comparative Syntactic Review of Null-Subject Parameter in English and Izon Languages Odingowei Kwokwo, 2016-02-12 Scientific Essay from the year 2010 in the subject English Language and Literature Studies Linguistics language English abstract The theory of universal grammar relies heavily on the biolinguistic concept of natural endowment and innate knowledge of the general principles of language It postulates that all humans are naturally endowed with the general rules and configurations of language and to this extent all natural languages have similar structural features The theory of universal grammar as hypothesised by Chomsky and propagated by other linguists however recognizes the existence of language specific idiosyncratic features that constitute parametric variations

among languages These are the parameters of universal grammar The most prominent parameters that create distinctions between languages are head directionality pro drop or null subject and wh parameters This paper reviews the null subject parameter in English and juxtaposes its occurrence or non occurrence in Izon language and its implications for language acquisition

The Contribution of Universal Grammar to Second Language Acquisition - Which Role is UG Likely to Play in SLA? Lena Linden, 2008-02 Seminar paper from the year 2006 in the subject English Language and Literature Studies Linguistics grade 1.3 University of Cologne Englisches Seminar course Research in Language Acquisition language English abstract If we take for granted that children acquire their first language with the help of an innate language acquisition device containing Universal Grammar is it likely that the acquisition of a second language works in the same way Is Universal Grammar still the driving force or did the prerequisites for the acquisition change in a way that learners need to consult other means and resources like only their general cognitive abilities and learning strategies There are many points in which first and second language acquisition differ It is these differences that made linguists doubt that first and second language acquisition are entirely the same process This paper is concerned with the question whether Universal Grammar is still available for second language learners and whether the mental grammar of L2 learners shows signs of impairment After a short introduction to the concept of Universal Grammar in first language acquisition it will turn to Universal Grammar in second language acquisition In this context it will be considered whether the interlanguage grammar might be impaired and whether UG is probable to influence second language acquisition Several theories of second language acquisition will be presented in advance to the discussion whether learners are likely to have full access partial access or no access to Universal Grammar Before being concluded it will take a short look at the problems that arise in second language research

Universal Grammar and Parameter Resetting in Second Language Acquisition Martin Kaltenbacher, 2001 Diese Arbeit wurde mit dem Förderpreis der Landeshauptstadt Salzburg zur Förderung von Kunst Wissenschaft und Literatur ausgezeichnet The book addresses the issue of Universal Grammar UG and parameter resetting in Second Language L2 acquisition The central questions are what is the initial state of a learner's L2 grammar and does UG play a role in L2 acquisition Several hypotheses are evaluated and set in relation to four parameters that are suggested to play a central role in UG and language acquisition Particular focus is put on parametric differences between English and German For this purpose Austrian learners have been tested on null subjects and adverbial and verb placement It is shown that the learners transfer the L1 parameter settings into their early English interlanguage grammars They are then involved in a disrupted process of parameter resetting which is not guided by UG but proceeds via cognitive processes and learning strategies

Contents Universal grammar in language acquisition The pro drop parameter Parameterisation of adverbial and adverb placement The head parameter A case study with Austrian learners of L2 English
