Mark,2012-12-06 For over twenty years I have been privileged to observe participate in and contribute to the development of the ideas and techniques that culminated in this most unusual impressive and useful book in words the total experience While it is difficult to convey of this innovative therapeutic approach this volume enables the reader to become a part of these therapy sessions and to learn to know and appreciate these fruitful methods The techniques described in detail in this volume are designed for use with children who are viewed as resistant and uncommunicative a fairly large percentage of youth who have not responded to traditional therapy The approach is based on many practical assumptions Among them are the idea that rhythm of whatever nature cannot be shut out that one can have pleasure in producing conversation fun of all things and that pleasure and acceptance lead to the integration of motility emotions and ideation These all lead to increased self esteem and competence The selection of the modality is completely individualized and leads to a therapy with the child not to or at the child To complete the circle the method is eminently teachable Thus both students in training and practicing therapists who are concerned with promoting growth and development in the children they treat will find this guide exceptionally useful and stimulating H D Dunton M D      **Paraverbal Communication with Children** E.
