**The Collapse of Parenting** Leonard Sax, 2024-10-01 In this New York Times bestseller, one of America's premier physicians offers a must-read account of the new challenges facing parents today and a program for how we can better prepare our children to navigate the obstacles they face. In *The Collapse of Parenting*, internationally acclaimed author Leonard Sax argues that rising levels of obesity, depression, and anxiety among young people can be traced to parents abdicating their authority. The result is children who have no standard of right and wrong, who lack discipline, and who look to their peers and the Internet for direction. Sax shows how parents must reassert their authority by limiting time with screens, by encouraging better habits at the dinner table, and by teaching humility and perspective to renew their relationships with their children. Drawing on nearly thirty years of experience as a family physician and psychologist, along with hundreds of interviews with children, parents, and teachers, Sax offers a blueprint parents can use to help their children thrive in an increasingly complicated world.

**Child Rearing in America** Neal Halfon, Kathryn Taaffe McLearn, Mark A. Schuster, 2002-07-08 This rich and well-researched volume comes in the wake of intense national interest in young children. Leading scholars from diverse disciplines use relevant data from the Commonwealth Survey of Parents with Young Children to present new information about the lives of families with very young children, how parents spend their time with their children, the economic and social challenges they face, and the supports they receive to improve their children's health and development. Such a broad portrait based on nationally representative data has not been attempted before.

Drawing on their extensive expertise and research in the issues being addressed the authors examine and elaborate on the survey findings They synthesize the major themes emerging from the data and consider the family community and policy implications to frame and interpret the results What emerges is a picture of the complex forces that influence families and child rearing in the early years

all the interests of a child to embrace their needs as reflected in the right to best care such actions arise from concern and love for the child But the case is made that certain expectations are unreasonable such as parents staying together and presumably being unhappy so that a child will be more comfortable The book s final chapter considers the question of state enforcement Parents the State and the Care Rights of Children is essential reading for all scholars and advanced students of jurisprudence the philosophy of law and social philosophy
