Privatization in Practice Joaquin Jay Gonzalez III, Roger L. Kemp, 2016-07-12 Cost efficiency was the initial goal of privatization achieved in many cases but not consistently. Public services provided by the private sector were cheap in the beginning but became increasingly expensive especially to low income citizens. The lessons learned from early successes and failures gave birth to a new goal: effectiveness of services as measured by accountable results. Government officials are not looking just for proven budget savings; they must also be concerned with the quality of public services and ultimately the happiness of citizens and communities. In its updated second edition this collection of essays explores the good and the bad sides of privatization. Instructors considering this book for use in a course may request an examination copy here.

*The Architect in Practice* David Chappell, Michael H. Dunn, 2016-01-26 Throughout its many editions *The Architect in Practice* has remained a leading textbook used in the education of architects. While the content of the book has developed, the message and philosophy has remained constant to provide students of architecture and young practitioners with a readable guide to the profession outlining an architect's duties to their client and contractor, the key aspects of running a building contract and the essentials of management, finance and drawing office procedure. The eleventh edition follows in that tradition. The text has been brought up to date to ensure it follows the new RIBA Plan of Work 2013 as the guide to the architect's workflow. In addition, a number of changes to standard forms of contract were made with the publication of the JCT 2011 suite of contracts and the RIBA Standard Form for the Appointment of an Architect 2010/2012 Revision. These new forms are fully covered. In addition, the opportunity has been taken to reorganise the layout so that the content flows in a way that is more consistent with current architectural practice and to deal with the increasing use of BIM. The eleventh edition of *The Architect in Practice* continues to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession.

**Nurses in the Workplace** Marie E. Cowart, William J. Serow, 1992-02-19 The dynamics of the workplace for nurses are examined in this volume from the perspective of four health care industries. Focusing on acute care hospitals, nursing homes, home health agencies and hospices, the contributors explore crucial issues for nursing and for health care systems. They present an extensive literature review on the causes and impacts of the US nursing shortage, introduce projections for the need for nurses and scrutinize recent policies. Results from a survey of hospitals, nursing homes, community based employment and temporary staff agencies are discussed and integrated with interpretations of market forces.
