## **Parliament Buildings:**

**Parliament Buildings** Sophia Psarra, Uta Staiger, Claudia Sternberg, 2023-10-30 As political polarisation undermines confidence in the shared values and established constitutional orders of many nations it is imperative that we explore how parliaments are to stay relevant and accessible to the citizens whom they serve The rise of modern democracies is thought to have found physical expression in the staged unity of the parliamentary seating plan However the built forms alone cannot give sufficient testimony to the exercise of power in political life Parliament Buildings brings together architecture history art history history of political thought sociology behavioural psychology anthropology and political science to raise a host of challenging questions How do parliament buildings give physical form to norms and practices to behaviours rituals identities and imaginaries How are their spatial forms influenced by the political cultures they accommodate What kinds of histories politics and morphologies do the diverse European parliaments share and how do their political trajectories intersect This volume offers an eclectic exploration of the complex nexus between architecture and politics in Europe Including contributions from architects who have designed or remodelled four parliament buildings in Europe it provides the first comparative multi disciplinary study of parliament buildings across Europe and across history Praise for Parliament Buildings In its totality this is an invaluable book both as a comprehensive review of the wider implications of architecture and building in culture and society and as a specific resource in the understanding of one highly specialised but profoundly significant building type Dean Hawkes Cardiff University and University of Cambridge Symbols of history and of hope theatres of struggle cradles of consensus parliamentary buildings as these diverse essays show both reflect our democracies and can help them function better David Anderson House of Lords Parliament Buildings is a brilliant interdisciplinary exploration of a fascinating topic Theoretically sophisticated empirically rich and historically informed it demonstrates the multiple ways in which politics and the built environment intersect and sheds light on the symbolic and material practices central to contemporary representative politics Duncan Bell University of Cambridge *Sessional Papers* Ontario.
