Make Believe Time:

The History of Make-Believe Holly Haynes, 2003-12-11 A theoretically sophisticated and illuminating reading of Tacitus especially the Histories this work points to a new understanding of the logic of Roman rule during the early Empire Tacitus in Holly Haynes analysis does not write about the reality of imperial politics and culture but about the imaginary picture that imperial society makes of these concrete conditions of existence the making up and believing that figure in both the subjective shaping of reality and the objective interpretation of it Haynes traces Tacitus s development of this fingere credere dynamic both backward and forward from the crucial year A D 69 Using recent theories of ideology especially within the Marxist and psychoanalytic traditions she exposes the psychic logic lurking behind the actions and inaction of the protagonists of the Histories Her work demonstrates how Tacitus offers penetrating insights into the conditions of historical knowledge and into the psychic logic of power and its vicissitudes from Augustus through the Flavians By clarifying an explicit acknowledgment of the difficult relationship between res and verba in the Histories Haynes shows how Tacitus calls into question the possibility of objective knowing how he may in fact be the first to allow readers to separate the objectively knowable from the objectively unknowable Thus Tacitus appears here as going further toward identifying the object of historical inquiry and hence toward an objective rendering of history than most historians before or since Child

Educational Times ,1893 Reasonable Children Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in On Becoming Responsible Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education

Munsey's Magazine ,1919 **Helena** Mrs. Humphry Ward,1919 He rose and began to pace his library a shabby comfortable room which he loved The room however had distinction like its master The distinction came perhaps from its few pictures of no great value but witnessing to a certain taste and knowledge on the part of the persons long since dead who hung them there from one or two cases of old Nankin from its old books and from a faded but enchanting piece of tapestry behind the cases of china which seemed to represent a forest
