*The Nature of Time: Geometry, Physics and Perception* R. Buccheri, Metod Saniga, William Mark Stuckey, 2012-12-06  
There are very few concepts that fascinate equally a theoretical physicist studying black holes and a patient undergoing serious mental psychosis Time undoubtedly can well be ranked among them For the measure of time inside a black hole is no less bizarre than the perception of time by a schizophrenic who may perceive it as completely suspended standing still or even reversing its direction The nature of time is certainly shrouded in profound mystery This perhaps since the concept entails multifarious and occasionally incongruous facets No wonder the subject attracts the serious attention of scholars on the one hand and of the lay public on the other Our Advanced Research Workshop is an excellent illustration of this point as the reader will soon discover It turned out to be a unique professional forum for an unusually lively effective and fruitful exchange of ideas and beliefs among 48 participants from 20 countries worldwide selected out of more than a hundred applicants The present book is based on the select talks presented at the meeting and aims to provide the interested layperson and specialist alike with a multidisciplinary sampling of the most up to date scholarly research on the nature of time It represents a coherent state of the art volume showing that research relevant to this topic is necessarily interdisciplinary and does not ignore such delicate issues as altered states of consciousness religion and metaphysics

*Advances in Psychology Research* Serge P. Shohov, 2004 *Advances in Psychology Research* presents original research results on the leading edge of psychology Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum  
*Advances in Sound Localization* Pawel Strumillo, 2011-04-11 Sound source localization is an important research field that has attracted researchers efforts from many technical and biomedical sciences Sound source localization SSL is defined as the determination of the direction from a receiver but also includes the distance from it Because of the wave nature of sound propagation phenomena such as refraction diffraction diffusion reflection reverberation and interference occur The wide spectrum of sound frequencies that range from infrasounds through acoustic sounds to ultrasounds also introduces difficulties as different spectrum components have different penetration properties through the medium Consequently SSL is a complex computation problem and development of robust sound localization techniques calls for different approaches including multisensor schemes null steering beamforming and time difference arrival techniques The book offers a rich source of valuable material on advances on SSL techniques and their applications that should appeal to researchers representing diverse engineering and scientific disciplines  
**Identified Flying Objects** Dr. Michael P. Masters, 2019-03-22 Could UFOs and Aliens simply be us but from the future This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past Dr Michael P Masters a professor of biological anthropology specializing in human evolutionary anatomy archaeology and biomedicine explores how the persistence of long term

biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc shaped craft which are likely the very devices that allow our future progeny to venture backward across the landscape of time Moreover these extraterrestrials are ubiquitously described as bipedal large brained hairless human like beings who communicate with us in our own languages and who possess technology advanced beyond but clearly built upon our own These accounts coupled with a thorough understanding of the past and modern human condition point to the continuation of established biological and cultural trends here on Earth long into the distant human future
