Finance in Europe Małgorzata Janicka,Artur Sajnóg,2025-06-09 Sustainable development is a major challenge of our times

The conditions necessary for sustainable transformation cut across all economic entities and sectors that operate on macro and micro economic scales both nationally and internationally The subject of sustainability has been represented in the

public space for years but there are few studies available on the practical implementation of the related goals and most publications focus on the issues of green finance and the environment A particularly large information gap relates to the role of sustainable finance in achieving sustainable development which has been underestimated for years This book

characterizes and evaluates how stock markets operate in European Union EU countries in terms of the sustainable

development of public companies The book addresses two key research areas Firstly it provides an analysis of the legal and institutional environment of the EU stock markets in the sustainable reconstruction of the European economy and secondly it

assesses the conditions for EU public companies to implement environmental social and governance ESG non financial reporting requirements and how the ESG indicators based on these function The book presents the methodology for

constructing ESG indicators with particular emphasis on Refinitiv which is one of the largest databases in this area and the most recognizable on a global scale The book is a valuable source of knowledge on the conditions and consequences of

changes in the financial markets especially the stock markets and is addressed primarily to the academic community but may also be informative engaging and useful for various stakeholders in the business sector including enterprises institutional and individual investors and financial institutions
