Modulated Coding For Intersymbol Interference Channels:

Modulated Coding for Intersymbol Interference Channels Xiang-Gen Xia, 2018-10-08 A study of modulated coding MC a technique for intersymbol interference ISI mitigation It discusses MC when the ISI is known at both transmitter and receiver and when only the receiver knows the ISI It showcases polynomial antiquity resistant modulated coding and provides an examination of transmitter assisted ISI equalization Power-efficient Coded Modulation for Wireless Infrared Communication David Chien Min Lee, 1998 **Applied Algebra, Algebraic Algorithms, and Error-correcting Codes**, 1990 *Coded Modulation and Bandwidth-efficient Transmission* Ezio Biglieri, Marco Luise, 1992 Almost two decades ago by using random coding bound arguments it was proved that considerable progress in the power efficiency of digital communication could be obtained by treating coding and modulation as a single entity These ideas were carried further in the manifestation of Trellis Coded Modulation TCM techniques Since then the idea of TCM has expanded greatly beyond the type of schemes originally presented and has given way to a considerable amount of research activity both theoretical and applied and to the implementation of several TCM techniques in new generations of modems Block Coded Modulation BCM was discovered at about the same time as TCM and is currently attracting considerable interest as a possible alternative to TCM for some applications A thorough overview on both kinds of coded modulation is discussed in this volume It assesses the status and the prospects of coded modulation and of bandwidth efficient transmission shedding light on the future avenue of theory and applications in these exciting areas **IBM Journal of Research and Development**, 1970 **Modulated Coding for Digital Communication Systems Under ISI/Multipath Fading and Jamming**, 2000 This report describes the main research achievements during the time period cited above on the research project in the area of telecommunications The main achievements include the systematic study of modulated codes that are convolutional codes defined on real complex field over intersymbol interference multipath jamming channels We obtained the joint maximum likelihood decoding and the MMSE DFE decoding algorithms We proved the existence of the coding gain compared to the uncoded AWGN channel We also obtained space time modulated codes for multiple transmit and multiple receive antenna systems A new precoded OFDM system was also obtained which is robust to spectral nulls *Proceedings of the 2000 IEEE Sensor Array and Multichannel Signal Processing Workshop* IEEE Signal Processing Society, 2000 This work contains the proceedings of the Sensor Array and Multichannel Workshop held in the year 2000 It should be useful to researchers professors practitioners students and professionals **Conference Record**, 1999 **MILCOM '98**, 1998 Proceedings of the Sixth Annual Princeton Conference on Information Sciences and Systems, 1972 *Index to IEEE Publications* Institute of Electrical and Electronics Engineers, 1990 Issues for 1973 cover the entire IEEE technical literature **EUROCON**, *Space Communications- Theory and Applications.
