Modulational Interactions In Plasmas:

Modulational Interactions in Plasmas Sergey V. Vladimirov, V.N. Tsytovich, S.I. Popel, F.K. Khakimov, 2013-03-09
Modulational Interactions in Plasmas is the first book to present all the basic considerations relevant to the topic. It adopts a simple and universal approach based on new methods developed for the description of modulation interactions in arbitrary media. Emphasis is given to the role of modulational interactions in fundamental topics such as laser acceleration, the generation of strong magnetic fields, rf plasma heating and current drive, physical phenomena in active geophysical and space experiments, interactions of rf radiation with the ionosphere, etc. The methods employed can also be applied to other areas of physics. Audience: Researchers in plasma and laser physics and nonlinear optics. **Lectures on Non-linear Plasma Kinetics** Vadim N. Tsytovich, 2012-12-06. Lectures on Non-linear Plasma Kinetics is an introduction to modern non-linear plasma physics showing how many of the techniques of modern non-linear physics find applications in plasma physics and how in turn the results of this research find applications in astrophysics. Emphasis is given to explaining the physics of nonlinear processes and the radical change of cross sections by collective effects. The author discusses new nonlinear phenomena involving the excitation of coherent nonlinear structures and the dynamics of their random motions in relation to new self-organization processes. He also gives a detailed description of applications of the general theory to various research fields including the interaction of powerful radiation with matter, controlled thermonuclear research, etc. **International Symposium on Laser-Plasma Interactions** Zhizhan Xu, 1993.
