Lohse, Anthony Hill, Ernő Lendvai, John Cage, François Molnar, Rudolf Arnheim, 1966      **Module, Proportion, Symmetry, Rhythm** Gyorgy Kepes, 1966      **Vision + Value Series: Module, proportion, symmetry, rhythm** Gyorgy Kepes, 1966      *Gyorgy Kepes* John R. Blakinger, 2019-06-25 How Gyorgy Kepes the last disciple of Bauhaus modernism became the single most significant artist within a network of scientific experts and elites Gyorgy Kepes 1906 2001 was the last disciple of Bauhaus modernism an acolyte of L szl Moholy Nagy and a self styled revolutionary artist But by midcentury transplanted to America Kepes found he was trapped in the military industrial aesthetic complex In this first book length study of Kepes John Blakinger argues that Kepes by opening the research laboratory to the arts established a new paradigm for creative practice the artist as technocrat First at Chicago s New Bauhaus and then for many years at MIT Kepes pioneered interdisciplinary collaboration between the arts and sciences what he termed interthinking and interseeing Kepes and his colleagues ranging from metallurgists to mathematicians became part of an important but little explored constellation the Cold War avant garde Blakinger traces Kepes s career in the United States through a series of episodes Kepes s work with the military on camouflage techniques his development of a visual design pedagogy as seen in the exhibition The New Landscape and his book The New Landscape in Art and Science his encyclopedic Vision Value series his unpublished magnum opus the Light Book the Center for Advanced Visual Studies CAVS an art science research institute established by Kepes at MIT in 1967 and the Center s proposals for massive environmental installations that would animate the urban landscape CAVS was entangled in the antiwar politics of the late 1960s as many students and faculty protested MIT s partnerships with defense contractors some of whom had ties to the Center In attempting to undream the Bauhaus into existence in the postwar world Kepes faced profound resistance Generously illustrated drawing on the vast archive of Kepes s papers at Stanford and MIT s CAVS Special Collection this book supplies a missing chapter in our understanding of midcentury modern and Cold War visual culture      **Experimentations** Branden Wayne Joseph, 2016-08-11 Experimentations provides a detailed historical and theoretical analysis of the first three decades of experimental composer John Cage s aesthetic production ca 1940 1972 Paying particular attention to Cage s inter and cross disciplinary engagements with the visual arts and architecture during this period the book sheds new light on some of Cage s most controversial and influential innovations such as the use of noise chance techniques indeterminacy electronic technologies and computerization as well as upon lesser known but important ideas and strategies such as transparency multiplicity virtuality and actualization Ultimately it traces the development of Cage s avant garde aesthetic and political project as it transformed from the emulation of historical avant garde precedents such as futurism and the Bauhaus to the development of important precedents for the post World War II movements of happenings and Fluxus to its ultimate

abandonment in the aftermath of problems encountered in the vast multimedia composition HPSCHD 1967 69      Triple Entendre Herve Vanel,2013-11-15 Triple Entendre discusses the rise and spread of background music in contexts as diverse as office workplaces shopping malls and musical performance Herv Vanel examines background music in several guises beginning with Erik Satie s Furniture Music of the late 1910s and early 1920s which first demonstrated the idea of a music not meant to be listened to and was later considered a precedent to modern functional background music Vanel argues that when the Muzak Corporation s commercialized ambient music became a predominant feature of modern life in the 1940s both as a brand and a genre of background music it also became a powerful instrument of social engineering in an advanced capitalist society Different kinds of music were developed to encourage or incite greater productivity in the workplace more energetic shopping or more animated socializing Vanel s discussion culminates in the creative response of the composer John Cage to the pervasiveness and power of background music in contemporary society Cage neither opposed nor rejected Muzak but literally answered its challenge by formulating a parallel concept that he called Muzak Plus Forty years after Satie presented his work to general critical puzzlement Cage saw how background music could be combined with mid century technology and theories of art and performance to create a participatory soundscape on a scale that Satie could not have envisioned again reconfiguring the listener s stance to music By examining the subterranean connections existing between these three formulations of a singular idea Triple Entendre analyzes and challenges the crucial boundary that separates an artistic concept from its actual implementation in life      A Year from Monday John Cage,2012-01-01 Includes lectures essays diaries and other writings including How to Improve the World You Will Only Make Matters Worse and Juilliard Lecture
