

Moln Di Amoln

Jonanna Widner

Moln Di Amoln:

Under the Red Banner Elvira Grözinger, Magdalena Ruta, 2008 The majority of European Yiddish speaking Jews was murdered by Hitler's National Socialists their cultural realm was destroyed. After the war the Communist regimes suppressed Jewish culture but despite emigration of Jewish survivors small Jewish communities continued to exist and made efforts to revive their culture in most of the Communist countries. Jewish organizations, clubs, cultural societies and theatres were founded and a great number of Yiddish books, newspapers and periodicals were printed despite political pressure, hostility and persecution. The cultural activity which developed under the red banner cannot of course be compared to the immense impact the Yiddish culture experienced before the Second World War but it was an important phenomenon in Jewish history which remained uninvestigated for a long time and has not been described in a proper way until today. This volume of seventeen essays is a collection of papers delivered by scholars from the USA, Sweden, Israel, Germany and Poland at the conference on Yiddish Culture in the Communist Countries in the Postwar Era which was organized at the Jagiellonian University, Cracow, in cooperation with the University of Potsdam in November 2006.

Without Jews? Magdalena

Ruta, 2017-06-19 Magdalena Ruta explores the virtually unknown area of Yiddish literature created in Poland after World War II. She unravels before general readers and future researchers numerous texts and analyses them in a lucid and captivating manner. The book should appeal to readers from various disciplines as well as to a non-scholarly audience as it touches upon difficult and complex problems that only recently have become the subject of thorough research and that are still perceived as controversial such as Polish-Jewish relations after the war or the fascination of a substantial number of Polish Jewish intellectuals with communism. It is worth stressing that the author deals with this sensitive topic competently and objectively.

collection of essays, many of them published previously in the 1980s/90s. The essays on pp. 7-232 focus on life in the Warsaw ghetto. The Jews who were deported to Treblinka from July 1942 passed through Zamenhof Street as they left the city. Describes the ghetto uprising of 19 April 1943 in which Zelazo took part and life on the Aryan side where he fled after the uprising. Some Jews on the Aryan side were helped by the Polish organization egota, however some were killed by Poles especially during the Polish uprising in August 1944. The rest of the book includes essays on the rescue work of Raoul Wallenberg, the Nuremberg Trials, the Słonik trial and life in Warsaw after the war.

Britannica Book of the Year Encyclopaedia Britannica, Inc,1998 Spine note Events of 1997 **THE RELIGION OF ANCIENT EGYPT** W.M. flinders Petrie,2021-02-06 Before dealing with the special varieties of the Egyptians belief in gods it is best to try to avoid a misunderstanding of their whole conception of the supernatural The term god has come to tacitly imply to our minds such a highly specialized group of attributes that we can hardly throw our ideas back into the more remote conceptions to which we also attach the same name It is unfortunate that every other word for supernatural intelligence has become debased so that we cannot well speak of demons devils ghosts or fairies without implying a noxious or a trifling meaning quite unsuited to the ancient deities that were so beneficent and powerful If then we use the word god for such conceptions it must always be with the reservation that the word has now a vastly different meaning from what it had to ancient minds To the Egyptians the gods might be mortal even Ra the sun god is said to have grown old and feeble Osiris was slain and Orion the great hunter of the heavens killed and ate the gods The mortality of gods has been dwelt on by Dr Frazer Golden Bough and the many instances of tombs of gods and of the slaying of the deified man who was worshipped all show that immortality was not a divine attribute Nor was there any doubt that they might suffer while alive one myth tells how Ra as he walked on earth was bitten by a magic serpent and suffered torments The gods were also supposed to share in a life like that of man not only in Egypt but in most ancient lands Offerings of food and drink were constantly supplied to them in Egypt laid upon the altars in other lands burnt for a sweet savor At Thebes the divine wife of the god or high priestess was the head of the harem of concubines of the god and similarly in Babylonia the chamber of the god with the golden couch could only be visited by the priestess who slept there for oracular responses The Egyptian gods could not be cognisant of what passed on earth without being informed nor could they reveal their will at a distant place except by sending a messenger they were as limited as the Greek gods who required the aid of Iris to communicate one with another or with mankind The gods therefore have no divine superiority to the man in conditions or limitations they can only be described as pre existent acting intelligence with scarcely greater powers than a man might hope to gain by magic or witchcraft of his own This conception explains how easily the divine merged into the human in Greek theology and how frequently divine ancestors occurred in family histories By the word theology is designated the knowledge about gods **Thoth, the Hermes of Egypt** Patrick Boylan,1922 **Space Atlas** James Trefil,2012 Filled with lavish illustrations this book is a grand tour of the universe Three ever widening domains are presented the planets the stars and the large scale universe itself each including the ones before it and extending outward The tour starts close to home within the first domain our own solar

system There is a tremendous variety here from the sun scorched rocks of Mercury to the icy vastness of the Kuiper Belt beyond Pluto We see the sun and planets born from the collapse of an interstellar dust cloud whose atoms were themselves created in long dead stars Since many of these planets have been visited by space probes or landers we are able to benefit from the incredible technology of exploration developed by NASA and its counterparts in other countries The second domain is made up of the billions of stars in our own Milky Way galaxy We walk in the steps of the American astronomer Edwin Hubble who first established that the universe is made up of discrete galaxies then go on to examine the fundamental constituents of those galaxies the stars We see stars not as eternal lights in the sky but as objects born out of a desperate struggle between pressure and gravity We trace the life cycle of our own sun from its birth 4 5 billion years ago to its quiet end 6 billion years in the future We see the galaxy not as a serene and placid place but as a giant factory where primordial material is taken up into stars then returned to the galaxy enriched with the heavy elements necessary for life Finally we move to the ultimate domain the large scale structure of the universe itself in which galaxies are the building blocks We discover the most amazing fact that the solid stuff of stars and planets on which we have been concentrating up to this point make up only a few percent of the mass in the universe with the rest being composed of two mysterious entities called respectively dark matter and dark energy We descend into deep caverns to see scientists trying to detect dark matter as it sweeps by the Earth and we talk to theorists trying to solve the riddle of dark energy This quest brings us to the frontier of knowledge the edge of the unknown To conclude two ultimate questions remain How did the universe begin How will the universe end We trace our theories back to the first fraction of a second of the life of the universe and listen to the speculations of cosmologists about how it might all have started
