## **Modernisation Of The PLA Gauging Its Latent Future Potential:**

Modernization of the Chinese PLA: From Massed Militia to Force Projection Lt Gen JS Bajwa, Modernisation of the PLA Jiti S. Bajwa, 2002 **CHINA: Threat or Challenge?** Lt Gen JS Bajwa, 2017-01-13 ndian Defence Review IDR had earlier in 2011 published a Book titled Threat from China edited by Late Bharat Verma Team IDR felt that since May 2014 when the National Democratic Alliance government took over the reins of governance in India bringing in a more focussed dynamic and assertive approach in conduct of its foreign relations it was necessary to review the security paradigm between India and China Moreover around the same time there had been a tactile parallel change in leadership at the helm in China too During the preliminary discussions there were strong views from a certain section of the community of academic scholars and diplomats that China was not an existential THREAT However the military community felt that the People s Liberation Army s substantive military modernisation manifested such a THREAT The academic and diplomatic community did feel that there was surely a CHALLENGE in dealing with an assertive rising China more relevant with a decline of US interest in Asia To accommodate both views the Title was thus revised to China Threat or Challenge The Book is a compilation of articles written and published in the IDR since May 2014 Some articles are by Authors who were requested to express their contrary views on the subject so as to present to the Readers broad based views of various Authors across the spectrum on issues impacting India China bilateral relations The final verdict of course lies entirely with the discerning Readers *Rise of China: Indian Perspective* Editors: Prof S Gopal, Nabeel A Mancheri, The remarkable rise of China in the last three decades has had a mixed global reaction While many countries have welcomed this rise some of China s neighbours have viewed it with concern if not consternation What does the rise of China signify for India given our none too smooth relationship with China and latter s unqualified support to Pakistan in military and nuclear field What do our leading companies feel about China Would the Indian Ocean be the scene of stiff confrontation between India and China Or is China Threat an exaggeration or hype as some would hold This book is the result of intense discussions on the above questions in a seminar held on Dec 20 21 2011 at the National Institute of Advanced Studies Bangalore The Chapters in this book based on papers presented by leading experts on China both from the Government and the Private sectors covers almost all aspects of China from internal political developments foreign policy to economy S T developments and Strategic capabilities particularly with respect to India China s growing military and economic clout and impressive advances in trade and technology have all been analysed by various speakers who are well known for their expertise on china China s views on India have also been brought out succinctly The Seminar was the first major interaction on a subject of strategic national interest It is hoped that the book would contribute to better understanding of China by both the interested citizens of this country and the policy makers

**Chinese Are Coming...: India-China Stand Off** Bharat Verma, *South Asia Defence And Strategic Year Book - 2009* General Deepak Kapoor,, AVSM PVSM, SM VSM Chief of Army Staff (India), 2009 The third edition of the South Asia Defence

and Strategic Year Book offers an analysis of defence economic and social issues that impact regional security in South Asia. The wide ranging perspectives give a deep insight into the factors and linkages that impact the emerging international relations of the region with particular emphasis on India which is an economic military and political powerhouse with an expanding footprint in the World. South Asia is a region that is rife with geopolitics. By virtue of its population and location it is a reflection of the challenges of the interconnected integrated and interdependent world. Its security environment is relatively unsettled and is a reason for both hope and despair. Its issues which have international as well as regional relevance have their own dynamics and trends that need a deeper understanding. The Year Book aims to provide a comprehensive overview of the security environment in the region by focusing on an in depth analysis of military capabilities and strategic imperatives obtaining in the region. Apart from outlining the general security environment detailed military balance trends in weapon systems and technology defence industry missile and nuclear capabilities and terrorism issues have been highlighted. Growing strategic linkages and independence of nation states make it imperative to consider the region as a whole to incorporate a holistic approach. The Year Book also contains studies on China and other Southeast Asian nations to that effect. Thus the underlying theme of this publication is to enable understanding through information. While the threat of terrorism remains at the forefront of most analyses the move towards popular and democratically elected governments in South Asia has not eclipsed the existing challenges to governance in all the countries of the region. Poverty and economic disparities coupled with ethnic and social divisions have created political and social fault lines that have been exploited by non state actors with their own agendas. Thus we hope to promote peace through understanding by delineating the issues of concern in the region.

*The New Asian Power Dynamic* Maharajakrishna Rasgotra, 2007-05-08. This volume examines the unfolding relationships among the five great powers in Asia the United States China India Japan and Russia. It explores recent bilateral relations between these states. While the central theme is how China the rising power and the US the sole superpower will deal with each other their policies and interactions will need to factor in the other three powers who will play significant roles in defining peace and stability in Asia.

*China and India* Waheguru Pal Singh Sidhu, Jing Dong Yuan, 2003. The hardline view of Sino Indian relations found in the published reports of Indian and Chinese security analysts is often at considerable odds with the more tempered opinions those same analysts express in private interviews and conversations. What is the reality of the increasingly important security relationship between the two countries? The authors of this new study address that question in depth. Sidhu and Yuan explore a range of key issues including mutual distrust and misperception perhaps the most important factor the undemarcated border the status of Tibet and Sikkim trade the tussle over various nonproliferation treaties terrorism the regional roles of the U S and Pakistan and the impact of domestic public opinion and special interests. They do see a trend toward a more pragmatic approach in Beijing and New Delhi to managing differences and broadening the agenda of common interests. Nevertheless they conclude significant obstacles remain to the

amicable relationship necessary for regional peace and stability posing a daunting challenge to policymakers in these two rising powers      **Indian Defense Review** ,      **Indian Defence Review** ,2006      **The Indian National Bibliography** ,2002-07      **South Asia Defence and Strategic Year Book** ,2009      *Bibliography of Agriculture* ,1973
