Tutankhamun's Tomb Susan J. Allen,2006 This richly illustrated book of vintage photographs commemorates one of the most memorable episodes in the history of archaeology the discovery and exploration in 1922 of the tomb of the ancient Egyptian pharaoh Tutankhamun Dynasty 18 ruled ca 1336 1327 B C These photographs documenting every stage in the

process of discovery were taken by the renowned archaeological photographer Harry Burton. Burton was a staff member of the Metropolitan Museum Egyptian Expedition when he was lent to Howard Carter the famed excavator of Tutankhamun's tomb. From the rock cut steps leading down to the entrance passage to the opening of the sealed chambers inside to the first view of the contents of the tomb and the removal of the objects, Burton's beautiful black and white photographs show thousands of the richly made and decorated objects found in the tomb. Carefully reproduced from Burton's original prints, the photographs are accompanied by new descriptive text written by two prominent Egyptologists with extensive knowledge of the history of Tutankhamun and the contents of his tomb. Treasures of Ancient Egypt Catherine Chambers, 2007. This text celebrates the artistic and architectural wonders of ancient Egypt including writing, jewellery, paintings and monuments. It provides information on the riches of the ancient Egyptian world from the mask of Tutankhamun to the Great Pyramids.

Gold of the Pharaohs Hans Wolfgang Müller, Eberhard Thiem, 1999. Red Man's America meets the great need for a comprehensive study of Indian societies from the first Stone Age hunters to the American citizens of today. Beginning with the first migrations of primitive man from Siberia in the Old World to Alaska in the New, probably during the latter part of the Pleistocene glaciations and his subsequent migration southward and eastward, the author takes up in turn the tribes and cultures of the various regions of North America. The material Professor Underhill has gathered from the fields of archaeology, ethnology and history together with that drawn from her own experience in the United States Indian Service produces a fascinating narrative. Red Man's America is an important contribution to our heritage of Indian life and lore. A work for which both sociologist and historian will be forever grateful. The author has combined a long period of study with actual field work in the service of the Indian to produce a work that gives a brief but well written and accurate sketch of the origins, backgrounds and customs of the various North American tribes. There is no other modern single volume that contains as much information on the subject. E. R. Vollmar. The Historical Bulletin. Liveliness in style and illustration together with perspicacity in content makes this book a useful introduction to the civilization of the original inhabitants of the land. Pacific Historical Review.

Iron from Tutankhamun's Tomb Katja Broschat, Florian Ströbele, Christian Koeberl, Christian Eckmann, Eid Mertah, 2022-06-14. A comprehensive study of the iron objects found in Tutankhamun's tomb that include daggers, quivers, arrows and an elaborately decorated bow case. A century after Howard Carter and Lord Carnarvon's sensational discovery in 1922 of the virtually intact tomb of Tutankhamun in the Valley of the Kings, the boy king and his treasures continue to fascinate people all over the world. Although nearly 5,400 objects accompanied the young pharaoh on his journey to the afterlife, many of them have not been investigated in detail. Iron from Tutankhamun's Tomb analyzes iron artifacts from the tomb in depth for the first time. This group consists of small iron chisels set into wooden handles, an Eye of Horus amulet, a miniature headrest and the blade of a richly decorated golden dagger. The most important of these were placed in close proximity to the king's mummy, emphasizing the high value attributed to this rare material in late Bronze Age.

Egypt a time when iron smelting was not yet known in the land of the Nile Written by a research team of archaeologists scientists and conservators this comprehensive study explores in fascinating detail the context and meaning of these artifacts while establishing for the first time that Tutankhamun's iron came from meteorites They complete their examination with the results of chemical analyses offering in the process a rich overall understanding of iron and its significance in ancient Egypt
