*Material London, Ca. 1600* Lena Cowen Orlin, 2000 *Material London* ca 1600 reconstructs one of the great world cities at a critical moment in Western history **Material London, ca. 1600** Lena Cowen Orlin, 2012-10-19 Between 1500 and 1700 London grew from a minor national capital to the largest city in Europe The defining period of growth was the period from 1550 to 1650 the midpoint of which coincided with the end of Elizabeth I's reign and the height of Shakespeare's theatrical career In *Material London* ca 1600 Lena Cowen Orlin and a distinguished group of social intellectual urban architectural and agrarian historians archaeologists cultural anthropologists and literary critics explore the ideas structures and practices that distinguished London before the Great Fire basing their investigations on the material traces in artifacts playtexts documents graphic arts and archaeological remains In order to evoke material London ca 1600 each scholar examines a different aspect of one of the great world cities at a critical moment in Western history Several chapters give broad panoramic and authoritative views what architectural forms characterized the built city around 1600 how the public theatre established its claim on the city how London's citizens incorporated the new commercialism of their culture into their moral views Other essays offer sharply focused studies how Irish mantles were adopted as elite fashions in the hybrid culture of the court how the city authorities clashed with the church hierarchy over the building of a small bookshop how London figured in Ben Jonson's exploration of the role of the poet Although all the authors situate the material world of early modern London its objects products literatures built environment and economic practices in its broader political and cultural contexts provocative debates and exchanges remain both within and between the essays as to what constitutes material London ca 1600 **Immigrants and the Industries of London, 1500-1700** Lien Bich Luu, 2017-03-02 Immigration is not only a modern day debate Major change in Europe in the sixteenth and seventeenth centuries led to a surge of political and religious refugees moving across the continent Estimates suggest that from 1550 to 1585 around 50 000 Dutch and Walloons from the southern Netherlands settled in England and in the late seventeenth century 50 000 Huguenots from France followed suit The majority gravitated towards London which already a magnet for merchants and artisans across the centuries began a process of major transformation New skills capital technical know how and social networks came with these migrants and helped to spark London's cosmopolitan flair and diversity But the early experience of many of these immigrants in London was one of hostility serving to slow down the adoption and expansion of new crafts and technologies *Immigrants and the Industries of London 1500 1700* examines the origins and the changing face and shape of many trades crafts and skills in the capital in this transformative period It focuses on three crafts in particular silk weaving beer brewing and the silver trade crafts which had relied heavily on foreign skills in the 16th century and had become major industries in the capital by the 18th century Each craft was established by a different group of immigrants distinguished not only by their social backgrounds social organisation identity motives migration pattern and experience and links with their home country

but also by the nature of their reception assimilation and economic contribution Change was a protracted process in the London of the day Immigrants endured inferior status discrimination and sometimes exclusion and this affected both their ability to integrate and their willingness to share trade secrets And resistance by the English population meant that the adoption of new skills often took a long time in some cases more than three centuries to complete The book places the adoption of new crafts and technologies in London within a broader European context and relates it to the phenomenal growth of the metropolis and technological developments within these specific trades It throws new perspectives on the movement of skills from Europe and the transmission of know how from the immigrant population to English artisans The book explores how through enterprise and persistence the immigrants contribution helped transform London from a peripheral and backward European city to become the workshop of the world by the nineteenth century By way of conclusion the book brings the current immigration debate full circle to examine the lessons we can draw from this early modern experience

**Country House Discourse in Early Modern England** Kari Boyd McBride, 2017-07-05 In this study Kari Boyd McBride defines country house discourse as a network of fictions that articulated and mediated early modern concerns about the right use of land and the social relationships that land engendered McBride provides new perspectives on the roles of the discourse she identifies linking it with a number of larger historical shifts during the time period Her interdisciplinary focus allows her to bring together a wide range of material including architecture poetry oil painting economic and social history and proscriptive literature in order to examine their complex interrelationship revealing connections unexplored in more narrowly focused studies McBride delineates the ways in which the country house on the landscape and in literature provided a locus for the construction of gender race class and nation Of particular interest is her focus on women s relationships to the country house their writing of country house poetry and their representation in that literature their designing of country houses and their lives within those architectural spaces whether as lady of the house or domestic servant One of the most important and promising insights in this study is that country house discourse was not simply static and nostalgic but actually worked to mediate change All in all she presents a fresh and detailed study of the great disparities between country house reality and the ideals that informed country house discourse

**Plotting Early Modern London** Dieter Mehl, 2017-03-02 With the publication of Brian Gibbons s Jacobean City Comedy thirty five years ago the urban satires by Ben Jonson John Marston and Thomas Middleton attained their official status as a Renaissance subgenre that was distinct by its farcical humour and ironic tone from citizen comedy or London drama more generally This retrospective genre building has proved immensely fruitful in the study of early modern English drama and although city comedies may not yet rival Shakespeare s plays in the amount of editorial work and critical acclaim they receive both the theatrical contexts and the dramatic complexity of the genre itself and its interrelations with Shakespearean drama justly command an increasing level of attention Looking at a broad range of plays written between the 1590s and the 1630s master pieces of the genre like

Eastward Ho A Trick to Catch the Old One The Dutch Courtesan and The Devil is an Ass blends of romance and satire like The Shoemaker s Holiday and The Knight of the Burning Pestle and bourgeois oddities in the Shakespearean manner like The London Prodigal the twelve essays in this volume re examine city comedy in the light of recently foregrounded historical contexts such as early modern capitalism urban culture the Protestant Reformation and playhouse politics Further they explore the interrelations between city comedy and Shakespearean comedy both from the perspective of author rivalry and in terms of modern adaptations the twenty first century concept of popular Shakespeare above all in the movie sector seems to realign the comparatively time and placeless Shakespearean drama with the gritty noisy and bustling urban scene that has been city comedy s traditional preserve

Producing Early Modern London Kelly J. Stage, 2018 Early seventeenth century London playwrights used actual locations in their comedies while simultaneously exploring London as an imagined ephemeral urban space Producing Early Modern London examines this tension between representing place and producing urban space In analyzing the theater s use of city spaces and places Kelly J Stage shows how the satirical comedies of the early seventeenth century came to embody the city as the city embodied the plays Stage focuses on city plays by George Chapman Thomas Dekker William Haughton Ben Jonson John Marston Thomas Middleton and John Webster While the conventional labels of city comedy or citizen comedy have often been applied to these plays she argues that London comedies defy these genre categorizations because the ruptures expansions conflicts and imperfections of the expanding city became a part of their form Rather than defining the city comedy comedy in this period proved to be the genre of London As the expansion of London s social space exceeded the strict confines of the square mile the city burgeoned into a new metropolis The satiric comedies of this period became in effect playgrounds for urban experimentation Early seventeenth century playwrights seized the opportunity to explore the myriad ways in which London worked taking the expected a romance plot a typical father son conflict a cross dressing intrigue and turning it into a multifaceted complex story of interaction and proximity

London and the Kingdom Matthew P. Davies, Andrew Prescott, 2008 This volume publishes the 2004 Harlaxton Conference comprising 25 papers on late medieval London A huge range of topics is covered many reflect London s pre eminence as a centre of trade with production and consumption guilds and their social religious and educational roles and customs and their evasion all featuring Other essays look at the capital as a centre of patronage artistic and literary whilst a final section looks at literacy
