## **Materials In Construction An Introduction:**

*Materials in Construction* G. D. Taylor, 2013-10-23 Materials in Construction An Introduction presents a clear and accessible introduction to the principles practice and performance of construction materials. This new edition is being published as a companion to G D Taylor's Materials in Construction Principles Practice and Performance an advanced text that will develop the topics presented in this book. The coverage of a wide range of construction materials provides a comprehensive foundation to the subject and includes an overview of performance characteristics and standards for many materials. The text also reviews material properties and examines and evaluates modes of deterioration while emphasising preventative techniques and remedial treatment. Throughout the text carefully devised example experiments and questions support the theory and practical information. Materials in Construction is an essential handbook for any student studying materials as part of a construction course at BTEC NC D HNC D and undergraduate level

**Materials Science In Construction: An Introduction** Arshad Ahmed, John Sturges, 2014-11-20 Materials Science in Construction explains the science behind the properties and behaviour of construction's most fundamental materials metals cement and concrete polymers timber bricks and blocks glass and plaster. In particular the critical factors affecting in situ materials are examined such as deterioration and the behaviour and durability of materials under performance. An accessible easy to follow approach makes this book ideal for all diploma and undergraduate students on construction related courses taking a module in construction materials
