Database Directory and Master Indices Edwin J. Atencio, Howard S. Bilofsky, June Bossinger, 2014-05-10 Nucleotide Sequences 1986 1987 Volume VIII Database Directory and Master Indices presents data that reflect the information found in GenBank Release 44.0 of August 1986. This book provides information pertinent to the unique international collaboration between two leading nucleotide sequence data libraries: one based in Europe and one in the United States. Organized into 13 sections, this volume begins with an overview of the sequences, some basic identifying information, and some of the biological annotations. This text then discusses the EMBL Nucleotide Sequence Data Library, an international center of fundamental research with its main emphasis in the fields of cell biology, molecular structures, instrumentation, and differentiation. This book discusses as well the GenBank database established in 1982 by the National Institute of General Medical Sciences (NIGMS) of the U.S. National Institutes of Health (NIH). This book is a valuable resource for molecular biologists and other investigators collecting the large number of reported DNA and RNA sequences and making them available in computer-readable form.

Nonparametric Testing in Excel - The Excel Statistical Master Mark Harmon, 2011-02-18 69 pages of complete step-by-step instructions showing how to perform nearly every major type of nonparametric test and how to do them all in Excel. This e-manual will make you an expert on knowing exactly how and when to use and set up in Excel all types of nonparametric tests such as the Mann-Whitney U Test, the Kruskal-Wallis Test, the Wilcoxon Rank-Sum Test for both large and small samples, the Spearman Correlation Coefficient Test, the Sign Test, and the Wilcoxon Signed-Rank Test for both large and small samples. This e-manual is loaded with completed examples and screenshots in Excel of all the above of nonparametric tests being performed. The instructions are clear and easy to follow but at the graduate level. If you are currently taking a difficult graduate-level statistics course that covers nonparametric or normality tests, you will find this e-manual to be an outstanding course supplement that will explain nonparametric tests much more clearly than your textbook does. If you are a business manager, you will really appreciate how easily and clearly this e-manual will show you how you can perform nonparametric tests in Excel to solve difficult statistical problems on your job. Nonparametric tests are the most important of all statistical tests in business but are not widely understood. Nonparametric testing must nearly always be performed in place of most well-known statistics tests when it is not known that samples are being taken from a normally distributed population. This is more often the case than not yet; not many people have a working knowledge of nonparametric testing. You will. This e-manual will make you an Excel Statistical Master of nonparametric testing.

Push Mike D'Errico, 2021-12-28 *Push* Software Design and the Cultural Politics of Music Production shows how music software has shaped the production techniques and performance practices of artists working across media while also providing a model for understanding software as a microcosm for the increasing convergence of globalization, neoliberal capitalism, and techno-utopianism that has come to define our digital lives.

International Economic Law and the Challenges of the Free Zones

Julien Chaisse, Jiaxiang Hu, 2019-05-02 Special economic zones SEZs have become a permanent feature of the world trade scene. This book, the first to provide a critical and comprehensive analysis of SEZs covering a wide spectrum of countries and regions, shows how SEZs, albeit established at the domestic level by different countries, raise multiple legal issues under international economic law. This first-rate book is the product of the Asia FDI Forum IV held in Hong Kong in 2018. Thoroughly exploring the development of the SEZ phenomenon and its players, the contributing authors—all leading economic law experts—review the issues raised by SEZs in the context of international trade law, international investment law, and investment arbitration. They identify the extent to which SEZs have been coherent in their design and policymaking in particular with regard to domestic law reforms. They address such aspects both as core themes and specific examples as the following: investment protection in China's SEZs; state-owned enterprises; regulation; dispute settlement under what circumstances; incentives available in SEZs; count as export subsidies prohibited under World Trade Organization (WTO) rules; compliance with internal market rules in European Union (EU) free zones; local populations as victims of land expropriation; Brazil's Manaus Free Trade Zone; India's experience with multiple SEZs; the administrative approval system in the Shanghai Free Trade Zone; economic corridors and transit routes as SEZs; refugee cities; SEZs for migrants; how China's Supreme People's Court serves national strategy; how foreign investors challenge free zone regimes; impacts of the establishment of SEZs on tax revenues; SEZs and labour migration and management models. The chapters also include insights into the new emerging generation of international investment agreements; WTO accession; transparency; and case law materials clarifying specific trade issues associated with SEZs and new rules to protect the environment and labour rights, as well as analysis of crucially significant cases such as *Goetz v The Republic of Burundi*, *Lee Jong Baek v Kyrgyzstan*, and *Ampal American and Others v Egypt*. With its critical and comprehensive analysis of the dynamic SEZ phenomenon across legal, economic, investment, regulatory, and policy matrices, including a thorough analysis of the success factors and required policies for SEZs, this book takes a giant step towards answering the question whether SEZs fundamentally contradict norms of international law or whether SEZs have to be considered as laboratories which facilitate the implementation of international economic policies. Its careful examination of theory and practice and its approach to lessons learned from case studies will reward trade and investment officials, policymakers, diplomats, economists, lawyers, think tanks, business leaders, and others interested in this ever more important area of law and economics.
