 Dobson Impressionism John I. Clancy,2003 Defining an artistic era or movement is often a difficult task as one tries to
 group individualistic expressions and artwork under one broad brush Such is the case with impressionism which culls
 together the art of a multitude of painters in the mid 19th century including Monet C zanne Renoir Degas and van Gogh

Basically impressionism involved the shedding of traditional painting methods The subjects of art were taken from everyday life as opposed to the pages of mythology and history In addition each artist painted to express feelings of the moment instead of hewing to time honoured standards This description of impressionism obviously is quite broad and can apply to a wide array of styles Nonetheless it remains a very important school in the annals of art Any current or budding art aficionado should become familiar with the impressionist movement and its impact on the art world This book presents a sweeping study of this artistic period from its origins to its manifestations in the works of some of art history s most revered painters Following this overview is a substantial and selective bibliography featuring access through author title and subject indexes
