[Math Wars](#) Carmen Latterell,2004-12-30 This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are concerned about their children's math learning Teachers are concerned about math teaching When parents see what children are bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are

the fear of many students The standards created by the NCTM do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers **Mathematics Anxiety** Irene C. Mammarella, Sara Caviola, Ann Dowker, 2019-02-18 Feelings of apprehension and fear brought on by mathematical performance can affect correct mathematical application and can influence the achievement and future paths of individuals affected by it In recent years mathematics anxiety has become a subject of increasing interest both in educational and clinical settings This ground breaking collection presents theoretical educational and psychophysiological perspectives on the widespread phenomenon of mathematics anxiety Featuring contributions from leading international researchers Mathematics Anxiety challenges preconceptions and clarifies several crucial areas of research such as the distinction between mathematics anxiety from other forms of anxiety i e general or test anxiety the ways in which mathematics anxiety has been assessed e g throughout self report questionnaires or psychophysiological measures the need to clarify the direction of the relationship between math anxiety and mathematics achievement which causes which Offering a revaluation of the negative connotations usually associated with mathematics anxiety and prompting avenues for future research this book will be invaluable to academics and students in the field psychological and educational sciences as well as teachers working with students who are struggling with mathematics anxiety Teaching and Learning of mathematics Noraini Idris, 2005
