the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this

comprehensive AERA sponsored Handbook Organized into seven sections the Handbook focuses on 1 disciplinary

foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and

organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from

multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and

questions have oriented current policy research What research strategies and methods have proven most fruitful And what

issues questions and methods will drive future policy research Topics such as early childhood education school choice access

to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The

politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections

concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and

the second addresses the current state of policy research This book is appropriate for scholars and graduate students

working in the field of education policy and for the growing number of academic government and think tank researchers
