*School Family and Community Partnerships: Preparing Educators and Improving Schools* addresses a fundamental question in education today: How will colleges and universities prepare future teachers, administrators, counselors, and other education professionals to conduct effective programs of family and community involvement that contribute to students' success in school? The work of Joyce L. Epstein has advanced theories, research, policies, and practices of family and community involvement in elementary, middle, and high schools, districts, and states nationwide. In this second edition, she shows that there are new and better ways to organize programs of family and community involvement as essential components of district leadership and school improvement.

**THE SECOND EDITION OFFERS EDUCATORS AND RESEARCHERS A framework for helping rising educators to develop comprehensive goal-linked programs of school family and community partnerships. A clear discussion of the theory of overlapping spheres of influence which asserts that schools, families, and communities share responsibility for student success in school. A historic overview and exploration of research on the nature and effects of parent involvement. Methods for applying the theory framework and research on partnerships in college course assignments, class discussions, projects, and activities, and field experiences. Examples that show how research-based approaches improve policies on partnerships, district leadership, and school programs of family and community involvement. Definitive and engaging.**
