

-STARTING A VEGETABLE GARDEN? -

# HERE'S SOME TOP TIPS

## LIGHT

Track the light of where you are wanting to plant. This helps you see how much shade or sunshine somewhere gets throughout the day before planting.

## PLANTING

If you are stuck for space, you can plant a lot of things in containers and pots. Just provide them with good drainage and check the depth and width the plant needs.

## GROW

Grow what you love to eat and use the most in your kitchen at first. Then experiment later on with more experience. This will help you find your feet and not get overwhelmed.

## MAINTENANCE

A vegetable garden can go from simple to challenging really quickly. Plant for the time you can give it. Things like root vegetables and brassicas need little effort.

## SEEDS

Seeds or starts? Growing from seed is cheaper and in most cases, leads to a healthier plant. But plant starts are a great way to step into your first time vegetable garden.

## SOIL

Soil is the backbone of your garden. Invest in it more than anything. Great soil will give you the head start you need. Dig or no dig? Decide what's best for you and your space.
