*Mathematics*, 1998 The authors of this text demonstrate using mathematical concepts to solve truly interesting problems about how our world works Mathematical modeling is the process of looking at a problem finding a mathematical core working within that core and coming back to see what mathematics tells you about the problem Real problems ask such questions as How do we create computer animations Where should we locate a fire station How do we effectively control an animal population This approach integrates a mix of ideas in geometry algebra and data analysis with technologies of computers and graphing calculators **Discrete Mathematics** Nancy Crisler, 2015 Mathematics Consortium for Mathematics and its Applications, 2000-03-05 A mathematics text intended to demonstrate mathematical concepts in the context of how people actually use them to solve problems Focuses on solving real problems by working in groups that use mathematical modeling to increase understanding of the task at hand Mathematics Landy Godbold, 1998 The authors of this text demonstrate using mathematical concepts to solve truly interesting problems about how our world works Mathematical modeling is the process of looking at a problem finding a mathematical core working within that core and coming back to see what mathematics tells you about the problem Real problems ask such questions as How do we create computer animations Where should we locate a fire station How do we effectively control an animal population This approach integrates a mix of ideas in geometry algebra and data analysis with technologies of computers and graphing calculators
