*Man or Matter* Ernst Lehrls, 2022-09-04 In *Man or Matter* Ernst Lehrls delves into the intricate relationship between human consciousness and the material world challenging traditional dichotomies that separate mind from matter. Set against the backdrop of early 20th century philosophical inquiry Lehrls employs a rich tapestry of literary styles merging philosophical discourse with poetic reflections. His exploration is heavily influenced by anthroposophy and the spiritual science movement seeking to bridge the gap between scientific rationalism and spiritualism. Through his keen analysis Lehrls presents a compelling case for a profound interconnectedness positing that humanity must recognize its role within the cosmos. Ernst Lehrls was a notable figure in anthroposophical circles deeply influenced by the teachings of Rudolf Steiner. His educational pursuits in philosophy and the natural sciences provided him with a robust foundation in both scientific inquiry and metaphysical exploration. This duality shaped his perspective in *Man or Matter* as he sought to articulate a vision of humanity that transcends mere materialism embedding rich spiritual dimensions into everyday existence. This book is a must read for anyone intrigued by the philosophical underpinnings of human existence and the metaphysical implications of modern science. Lehrls eloquent prose not only enlightens but also inspires readers to reflect upon their own consciousness in relation to the universe making it an essential addition to the libraries of philosophers scientists and spiritual seekers alike.

*From Matter to Man* A. Redcote Dewar, 2015-06-25 Excerpt from *From Matter to Man* A New Theory of the Universe. The preliminary problem in all human speculation has ever been the origin of existence and it still frets the natural philosopher but the solution is partly determined by the definition of the problem and its accuracy for to day depends almost wholly upon the meaning which present intelligence attaches to the term origin. Every origin in the universe necessarily includes both the thing made and that out of which it is made. For as nothing begets nothing so something must be begotten of something. As no definition of origin therefore however orthodox can be accurate which assumes a creation of something from nothing origin in so far as it refers to the universe is meaningless.
