Maxdata A Time Series Database System:

Maxdata Wilhelm A. Hennerkes, 2012-12-06 This handbook gives a detailed introduction to the Time Series Database System MAXDATA which offers a very simple and convenient handling of voluminous numerical databases on a personal computer It may be regarded as a special education and teaching instrument for the management and evaluation of empirical data and will teach the reader how to do empirical work without any effort The handbook aims to give the reader a precise idea of the creation management documentation and evaluation of voluminous numerical databases on a microcomputer and gives some tips for managing individual numerical databases but also for having direct access to official national and international economic offline databases We believe that you will not regret your decision to use MAXDATA in your day to day work with statistical data analyses graphics reports etc Our aim was to design a software product which solves all the major problems associated with professional decentralized data processing whilst meeting the highest user requirements for user friendliness and performance We hope we have succeeded positive user response appear to prove our point Why MAXDATA was created MAXDATA was born of frustration at the multiplicity of computer programs flooding the software market many of which offer extremely high performance almost to the point of confusion but which can generally only be used by computer specialists or those who have undergone a long period of training

Aggregation and Representation of Preferences Andranick S. Tanguiane, 2012-12-06 Aggregation is the conjunction of information aimed at its compact representation Any time when the totality of data is described in terms of generalized indicators conventional counts typical representatives and characteristic dependences one directly or indirectly deals with aggregation It includes revealing the most significant characteristics and distinctive features quantitative and qualitative analysis As a result the information becomes adaptable for further processing and convenient for human perception Aggregation is widely used in economics statistics management planning system analysis and many other fields That is why aggregation is so important in data processing Aggregation of preferences is a particular case of the general problem of aggregation It arises in multicriteria decision making and collective choice when a set of alternatives has to be ordered with respect to contradicting criteria or various individual opinions However in spite of apparent similarity the problems of multicriteria decision making and collective choice are somewhat different Indeed an improvement in some specifications at the cost of worsening others is not the same as the satisfaction of interests of some individuals to the prejudice of the rest In the former case the reciprocal compensations are considered within a certain entirety in the latter we infringe upon the rights of independent individuals Moreover in multicriteria decision making one usually takes into account objective factors whereas in collective choice one has to compare subjective opinions which cannot be measured properly
