

MAXIMUM FORCE

The movie poster features a woman with long blonde hair, wearing a black dress, holding a handgun. Behind her, a man in a light blue tank top is also holding a handgun. They are positioned in front of a large, intense fire that appears to be consuming a city at night. The title 'MAXIMUM FORCE' is at the top in large, blue, stylized letters.

Theory and Design of Railway Truss Bridges John F. Unsworth, 2025-06-17 Railroad bridges are a critical component of the infrastructure and economy of many countries and many of these bridges are nearing the end of their useful service life. *Theory and Design of Railway Truss Bridges* provides comprehensive coupled information regarding the structural analysis and design of steel railway truss spans. Most books cover either analysis or design of structures but none cover both the analysis and design of railway trusses. Further, the book presents technical information on the analysis of railway trusses currently unavailable in other modern books. It also provides readers with up to date information concerning the modern methods of design recommended by the American Railway Engineering and Maintenance of Way Association (AREMA). Includes detailed information on the analysis of trusses for moving loads. Presents information on topics specific to railway trusses such as loading effects, secondary stresses and stress reversal. Includes information on the history of railway truss analysis, design and construction. Covers methods for the analysis of statically indeterminate spans. Describes methods to determine the displacement of truss spans. Provides up to date theory and design methods based on current AREMA recommendations.

Digital Human Modeling Vincent G. Duffy, 2009-07-14 The 13th International Conference on Human Computer Interaction (HCI International 2009) was held in San Diego, California, USA, July 19-24, 2009, jointly with the Symposium on Human Interface Japan 2009, the 8th International Conference on Engineering Psychology and Cognitive Ergonomics, the 5th International Conference on Universal Access in Human Computer Interaction, the Third International Conference on Virtual and Mixed Reality, the Third International Conference on Internationalization Design and Global Development, the Third International Conference on Online Communities and Social Computing, the 5th International Conference on Augmented Cognition, the Second International Conference on Digital Human Modeling and the First International Conference on Human Centered Design. A total of 4,348 individuals from academia, research institutes, industry and governmental agencies from 73 countries submitted contributions and 1,397 papers that were judged to be of high scientific quality were included in the program. These papers dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Advances in Physical Ergonomics and Safety Tareq Z. Ahram, Waldemar Karwowski, 2012-07-10 Based on recent research, this book discusses physical ergonomics, which is concerned with human anatomical, anthropometric, physiological and biomechanical characteristics as they relate to physical activity. Topics include working postures, materials handling, repetitive movements, work-related musculoskeletal disorders, workplace layout, safety and health.
