Maximum Asterix Goscinny, Albert Uderzo, 1999 Presents five tales of the indomitable Gauls Asterix and Obelix as they counter the plots of the invading Romans travel throughout the ancient world and encounter other adventures **Cliques, Coloring, and Satisfiability** David S. Johnson, Michael A. Trick, 1996-01-01 The purpose of a DIMACS Challenge is to encourage and coordinate research in the experimental analysis of algorithms The First DIMACS Challenge encouraged experimental work in the area of network flow and matchings This Second DIMACS Challenge on which this volume is based took place in conjunction with the DIMACS Special Year on Combinatorial Optimization Addressed here are three difficult combinatorial optimization problems finding cliques in a graph colouring the vertices of a graph and solving instances of the satisfiability problem These problems were chosen both for their practical interest and because of their theoretical intractability **Computer Architecture** Ana Lucia Varbanescu, Anca Molnos, Rob van Nieuwpoort, 2012-02-15 This book constitutes the thoroughly refereed post conference proceedings of the workshops held at the 37th International Symposium on Computer Architecture ISCA 2010 in Saint Malo France in June 2010 The 28 revised full papers presented were carefully reviewed and selected from the lectures given at 5 of these workshops The papers address topics ranging from novel memory architectures to emerging application design and performance analysis and encompassed the following workshops A4MMC applications for multi and many cores AMAS BT 3rd workshop on architectural and micro architectural support for binary translation EAMA the 3rd Workshop for emerging applications and many core architectures WEED 2nd Workshop on energy efficient design as well as WIOSCA the annual workshop on the interaction between operating systems and computer architecture *Python Scripting for Computational Science* Hans Petter Langtangen, 2009-01-09 With a primary focus on examples and applications of relevance to computational scientists this brilliantly useful book shows computational scientists how to develop tailored flexible and human efficient working environments built from small scripts written in the easy to learn high level Python language All the tools and examples in this book are open source codes This third edition features lots of new material It is also released after a comprehensive reorganization of the text The author has inserted improved examples and tools and updated information as well as correcting any errors that crept in to the first imprint *Developing and Promoting Graphic Novel Collections* Steve Miller, 2005 Offers public and school librarians effective strategies for building and promoting graphic novel collections that meet the needs of students **Plant Nematology, 3rd Edition** Roland N.
