*Night and Darkness in Ancient*

*Mesoamerica* Nancy Gonlin, David Millard Reed, 2021-12-01 Night and Darkness in Ancient Mesoamerica is the first volume to explicitly incorporate how nocturnal aspects of the natural world were imbued with deep cultural meanings and expressed by different peoples from various time periods in Mexico and Central America. Material culture, iconography, epigraphy, art history, ethnohistory, ethnographies, and anthropological theory are deftly used to illuminate dimensions of darkness and the night that are often neglected in reconstructions of the past. The anthropological study of night and darkness enriches and strengthens the understanding of human behavior, power, economy, and the supernatural. In eleven case studies featuring the residents of Teotihuacan, the Classic period Maya, inhabitants of Rio Ul a, and the Aztecs, the authors challenge archaeologists to consider the influence of the ignored dimension of the night and the role and expression of darkness on ancient behavior. Chapters examine the significance of eclipses, burials, tombs, and natural phenomena considered to be portals to the underworld, animals hunted at twilight, the use and ritual meaning of blindfolds, night-blooming plants, nocturnal foodways, fuel sources, and lighting technology, and other connected practices. *Night and Darkness in Ancient Mesoamerica* expands the scope of published research and media on the archaeology of the night. The book will be of interest to those who study the humanistic, anthropological, and archaeological aspects of the Aztec, Maya, Teotihuacanos, and southeastern Mesoamericans, as well as sensory archaeology, art history, material culture studies, anthropological archaeology, paleonutrition, socioeconomics, sociopolitics, epigraphy, mortuary studies, volcanology, and paleoethnobotany. Contributors: Jeremy Coltman, Christine Dixon, Rachel Egan, Kirby Farah, Carolyn Freiwald, Nancy Gonlin, Julia Hendon, Cecelia Klein, Jeanne Lopiparo, Brian McKee, Jan Marie Olson, David M. Reed, Payson Sheets, Venicia Slotten, Michael Thomason, Randolph Widmer, W. Scott Zeleznik.

*Star Gods of the Maya* Susan Milbrath, 1999-01-01 Observations of the sun, moon, planets, and stars played a central role in ancient Maya lifeways as they do today among contemporary Maya who maintain the traditional ways. This pathfinding book reconstructs ancient Maya astronomy and cosmology through the astronomical information encoded in Precolumbian Maya art and confirmed by the current practices of living Maya peoples. Susan Milbrath opens the book with a discussion of modern Maya beliefs about astronomy along with essential information on naked eye observation. She devotes subsequent chapters to Precolumbian astronomical imagery which she traces back through time starting from the Colonial and Postclassic eras. She delves into many aspects of the Maya astronomical images including the major astronomical gods and their associated glyphs, astronomical almanacs in the Maya codices, painted books, and changes in the imagery of the heavens over time. This investigation yields new data and a new synthesis of information about the specific astronomical events and cycles recorded in Maya art and architecture. Indeed, it constitutes the first major study of the relationship between art and astronomy in ancient Maya culture.
