Matrices And Matlab A Tutorial:

Matrices and MATLAB Marvin Marcus,1993 This thorough exploration of all aspects of modern matrix theory integrates the use of MatLab tm from the beginning *Mastering MATLAB 5* Duane C. Hanselman,Bruce Littlefield,1998 Does not cover release 5.3 details but still is the most complete title on MATLAB *Matrix Analysis of Circuits Using MATLAB* James G. Gottling,1995 Illustrating how to solve linear circuit problems using MATLAB this book describes matrix representation of linear equations matrix manipulation and numerical solution methods for linear equations It provides a tutorial that focuses on MATLAB's ability to perform tasks that are useful in circuit analysis and shows how to write DC and AC circuit equations directly by inspection of a circuit diagram using nodal analysis mesh analysis or modified nodal analysis MNA even for a circuit that has controlled sources It also explains how to construct Bode plots and to obtain transient solutions for circuits using MATLAB lists the new MATLAB circuit functions in an appendix and provides all of the example M files and the new circuit M file functions on an accompanying diskette **The Bulletin of Mathematics Books** ,1992 **The MATLAB Project Book for Linear Algebra** Rick L. Performance Analysis and Modeling of Digital Transmission Systems William Turin, 2012-12-06 This book is an expanded third edition of the book Performance Analysis of Digital Transmission Systems originally published in 1990 Second edition of the book titled Digital Transmission Systems Performance Analysis and Modeling was published in 1998 The book is intended for those who design communication systems and networks A computer network designer is interested in selecting communication channels error protection schemes and link control protocols To do this efficiently one needs a mathematical model that accurately predicts system behavior Two basic problems arise in mathematical modeling the problem of identifying a system and the problem of applying a model to the system analysis System identification consists of selecting a class of mathematical objects to describe fundamental properties of the system behavior We use a specific class of hidden Markov models HMMs to model communication systems This model was introduced by C E Shannon more than 50 years ago as a Noisy Discrete Channel with a finite number of states The model is described by a finite number of matrices whose elements are estimated on the basis of experimental data We develop several methods of model identification and show their relationship to other methods of data analysis such as spectral methods autoregressive moving average CARMA approximations and rational transfer function approximations

Elementary Linear Algebra Stanley I. Grossman, 1994 Intended for the first course in linear algebra this widely used text balances mathematical techniques and mathematical proofs It presents theory in small steps and provides more examples and exercises involving computations than competing texts
