General Industry Standards and Interpretations United States. Occupational Safety and Health Administration, 1989
Occupational Safety and Health: General industry standards and interpretations United States. Occupational Safety and Health Administration, 1972 **"Process Work" Year Book** , 1913 *Calculating Risks?* James Hamilton, W. Kip

Viscusi, 1999 By matching agency decision data to detailed census information using geographic information systems GIS technology the authors show that most hazardous waste sites do not pose sufficient risk to merit the most stringent cleanup options Those sites that do pose considerable risk to exposed populations often receive inadequate attention because government decisions to target cleanups are based more on political factors than on actual risks The authors propose policy reforms that could significantly reduce cleanup costs without sacrificing the protection of human health **BOOK JACKET**
