Making Disability:

Making Disability Modern Bess Williamson, Elizabeth Guffey, 2020-07-23 *Making Disability Modern Design Histories* brings together leading scholars from a range of disciplinary and national perspectives to examine how designed objects and spaces contribute to the meanings of ability and disability from the late 18th century to the present day and in homes offices and schools to realms of national and international politics The contributors reveal the social role of objects particularly those designed for use by people with disabilities such as walking sticks wheelchairs and prosthetic limbs and consider the active role that makers users and designers take to reshape the material environment into a usable world But it also aims to make clear that definitions of disability and ability are often shaped by design **Making Disability** Paul C. Higgins, 1992

Disability and Social Theory D. Goodley, B. Hughes, L. Davis, 2012-06-01 This comprehensive interdisciplinary collection examines disability from a theoretical perspective challenging views of disability that dominate mainstream thinking Throughout social theories of disability intersect with ideas associated with sex gender race ethnicity class and nation

Making and Unmaking Disability Julie E. Maybee, 2019-09-16 If the future is accessible as Alisa Grishman one of 55 million Americans categorized as having a disability writes in this book's cover image then we must stop making or constructing people as disabled and impaired In this brave new theoretical approach to human physicality Julie E Maybee traces societal constructions of disability and impairment through Western history along three dimensions of embodiment the personal body the interpersonal body and the institutional body Each dimension has played a part in defining people as disabled and impaired in terms of employment healthcare education and social and political roles Because impairment and disability have been constructed along all three of these bodies unmaking disability and making the future accessible will require restructuring Western institutions including capitalism changing how social roles are assigned and transforming our deepest beliefs about impairment and disability to reconstruct people as capable Ultimately Maybee suggests unmaking disability will require remaking our world *Disability, Space, Architecture: A Reader* Jos Boys, 2017-02-17 *Disability Space Architecture A Reader* takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially *Disability Space Architecture A Reader* opens up not just disability but also ability disability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people

objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about disability can enable innovative and new kinds of critical and creative architectural and urban design education and practice

Federal Register ,1981-05-26 *Public Documents* Washington (State),1913 Designing Disability Elizabeth Guffey,2017-12-28 *Designing Disability* traces the emergence of an idea and an ideal physical access for the disabled through the evolution of the iconic International Symbol of Access ISA The book draws on design history material culture and recent critical disability studies to examine not only the development of a design icon but also the cultural history surrounding it Infirmary and illness may be seen as part of human experience but disability is a social construct a way of thinking about and responding to a natural human condition Elizabeth Guffey s highly original and wide ranging study considers the period both before and after the introduction of the ISA tracing the design history of the wheelchair a product which revolutionised the mobility needs of many disabled people from the 1930s onwards She also examines the rise of barrier free architecture in the reception of the ISA and explores how the symbol became widely adopted and even a mark of identity for some especially within the Disability Rights Movement Yet despite the social progress which is inextricably linked to the ISA a growing debate has unfurled around the symbol and its meanings The most vigorous critiques today have involved guerrilla art graffiti and studio practice reflecting new challenges to the relationship between design and disability in the twenty first century

Best's Compilation of Disability and Double Indemnity Provisions of All Legal Reserve Life Insurance Companies Operating in the United States ,1922 **Making Computers Accessible** Elizabeth R. Petrick,2015-06 The revolution in accessible computer technology was fueled by disability activism the interactive nature of personal computers and changing public policy In 1974 not long after developing the first universal optical character recognition technology Raymond Kurzweil struck up a conversation with a blind man on a flight Kurzweil explained that he was searching for a use for his new software The blind man expressed interest One of the frustrating obstacles that blind people grappled with he said was that no computer program could translate text into speech Inspired by this chance meeting Kurzweil decided that he must put his new innovation to work to overcome this principal handicap of blindness By 1976 he had built a working prototype which he dubbed the Kurzweil Reading Machine This type of innovation demonstrated the possibilities of computers to dramatically improve the lives of people living with disabilities In *Making Computers Accessible* Elizabeth R Petrick tells the compelling story of how computer engineers and corporations gradually became aware of the need to make computers accessible for all people Motivated by user feedback and prompted by legislation such as the Americans with Disabilities Act which offered the promise of equal rights via technological accommodation companies developed sophisticated computerized devices and software to bridge the accessibility gap People with disabilities Petrick argues are paradigmatic computer users demonstrating the personal computer s potential to augment human abilities and provide for new forms of social professional and political participation Bridging the history of technology science and technology studies

and disability studies this book traces the psychological cultural and economic evolution of a consumer culture aimed at individuals with disabilities who increasingly rely on personal computers to make their lives richer and more interconnected
