**The Making of Intelligence** Ken Richardson, 2002-04 What do we mean when we describe a person as intelligent The concept of intelligence wields a powerful influence on research dealing with the brain and on how individuals progress in society Yet remarkably there is no scientific consensus about the meaning of intelligence Ken Richardson looks at how intelligence has been characterized and measured in the past explores current trends in our understanding and uses of the concept and predicts what form these trends will take in the future From the writings of Charles Darwin and Herbert Spencer on evolution and adaptation to the reflections of Jean Piaget and Lev Vygotsky on logical reasoning from the formulation of early IQ tests by Francis Binet and Henri Simon to their recent provocative rebirth in the assertions of The Bell Curve by Charles Murray and Richard Herrnstein The Making of Intelligence is a lucid judicious critical analysis of this controversial and important subject

The Ethics of National Security Intelligence Institutions Adam Henschke, Seumas Miller, Andrew Alexandra, Patrick F. Walsh, Roger Bradbury, 2024-03-19 This book explores the ethics of national security intelligence institutions operating in contemporary liberal democracies Intelligence collection by agencies such as the CIA MI6 and Mossad involves practices that are apparently inconsistent with the principles of ordinary morality practices such as lying spying manipulation and covert action However in the defence of national security such practices may not only be morally permissible but may also under some circumstances be morally obligatory One approach to the ethics of national security intelligence activity has been to draw from the just war tradition so called just intelligence theory This book identifies significant limitations of this approach and offers a new institutionally based teleological normative framework In doing so it revises some familiar principles designed for application to kinetic wars such as necessity and proportionality and invokes some additional ones such as reciprocity and trust It goes on to explore the applications of this framework and a revised set of principles for national security intelligence institutions and practices in contemporary and emerging political and technological settings This book will be of much interest to students of intelligence studies ethics security studies and International Relations

as he does It is the well known historian s straightforward account of how our intelligence has evolved into the mental habits of modern life No book for popular reading shows so graphically that our thinking remains medieval in a world that has become complex and modern It will show you whether your thinking is ahead of the times or behind them If some magical transformation could be produced in men s ways of looking at themselves and their fellows no inconsiderable part of the evils which now afflict society would vanish away or remedy themselves automatically If the majority of influential persons held the opinions and occupied the point of view that a few rather uninfluential people now do there would for instance be no likelihood of another great war the whole problem of labor and capital would be transformed and attenuated national arrogance race animosity political corruption and inefficiency would all be reduced below the danger point      **Daily Intelligence** International Labour Office,International Labour Organization,1921      Report of the Survey of the Specially Handicapped Children in the State of Illinois Institute for Juvenile Research (Ill.),1925      The Intelligence ,1904      **Daily Intelligence** ,1921      *Institution Quarterly* ,1925      *The University Intelligence Tests, 1919-1922* ...
