Making Capitalism in China You-tien Hsing, 1998 *Making Capitalism in China The Taiwan Connection* shows that small and medium sized Taiwanese investors are organized in production and marketing networks not vertically integrated conglomerates. When in China they directly negotiate and establish partnerships with entrepreneurial local officials not the central bureaucracy. Also they effectively transfer a capitalist ideology of production to Chinese factory workers. Importantly the investors attribute their business successes in China to the cultural historical and linguistic affinities they share with these local agents. Connections regarding socio cultural identity do more than facilitate business dealings or ease labor relations. Hsing asserts that partnerships between mainland settlements and overseas Chinese investors constitute a local global coalition of economic reform one that strengthens local autonomy in China and bypasses the control of the central government. This coalition is nothing short of a new pattern of foreign direct investment one profoundly influenced by both cultural boundaries usually deemed insignificant in matters of capital flow and globalization and local state agents who operate in this case as crucial business partners. A notable work that will appeal to all students of East Asian economic organization ethnic business networks international investment and the political economy of socialist transition. Hsing's book is based on hundreds of interviews and participatory observations that she conducted between 1991 and 1996 with investors local officials and factory workers in Taiwan Hong Kong Guangdong Fujian and Shanghai.

**Making Capitalism in Rural China** Michael John Webber, 2012-01-01 This stimulating and challenging book explores the duplicitous nature of development in China. On the positive side it brings longer and healthier lives fewer children dead before they are five years old more comfort and security from famine and disaster more education more communication more travel less war. But from another darker perspective development brings violence to some people those who are in the way of the new things those who cannot adapt to the new ways and it threatens old knowledges habits and societies as it disrupts old power structures. Michael Webber presents fascinating case studies that demonstrate what these forms of development mean for people who are relatively weak or powerless those who post colonial theorists call the subalterns. The cases illustrate how development can change the manner in which people relate to each other and threatens their entire environment. Through this detailed consideration of the impacts of development on the people who live in those places he examines whether these changes represent the emergence of capitalism or a transition. Webber develops a theory of relationships between economy and daily life and questions the very nature of Chinese capitalism. This multidisciplinary study encompasses the social sciences to provide a coherent view of the forms that development takes in various places within rural China. As such it will prove a fascinating and thought provoking read for undergraduates postgraduate students and researchers within economics Asian studies development studies and geography.

**China's Transition from Communism - New Perspectives** Guoguang Wu, Helen Lansdowne, 2015-11-06 As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy It is now clear however that political liberalisation does not necessarily follow economic liberalisation This book explores this apparent contradiction presenting many new perspectives and new thinking on the subject It considers the path of transition in China historically makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present A key feature of the book is the fact that most of the contributors are China born Western trained scholars who bring deep knowledge and well informed views to the study

**Politics in China** William A. Joseph, 2014 On October 1 2009 the People's Republic of China PRC celebrated the 60th anniversary of its founding And what an eventful and tumultuous six decades it had been During that time under the leadership of the Chinese Communist Party CCP China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence Over those same years the PRC also experienced the most deadly famine in human history caused largely by the actions and inactions of its political leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy Today China is for the most part peaceful prospering and proud This is the China that was on display for the world to see during the Beijing Olympics in 2008 The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme

inequalities and a rising tide of social protest Politics in China is an authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today Written by leading China scholars the book's chapters offers accessible overviews of major periods in China's modern political history from the mid nineteenth century to the present key topics in contemporary Chinese politics and developments in four important areas located on China's geographic periphery Tibet Xinjiang Hong Kong and Taiwan *China in the Family of Nations* Henry Theodore Hodgkin, 1928

**China Review**, 1924 *Making Capitalism Work* Leonard Silk, Mark Silk, 1996-11-01 In 1995 Republicans came to power in the United States with an ambitious program proposing to embrace a degree of laissez faire economics unknown for generations anywhere in the industrialized world Simultaneously politicians entrepreneurs and economists championed the new bastions of unregulated capitalism that sprung up in such unfamiliar precincts as Beijing and Moscow Yet to date many free market economic policies be it in Prague or here in America have not lived up to their initial promises In fact it has become a common joke in Russia that capitalism has succeeded in making communism look good a feat unaccomplished by the Kremlin in its 70 year reign In *Making Capitalism Work* Leonard and Mark Silk analyze the failures and successes of capitalism as seen most recently in the former Soviet Bloc Japan China the European Community and the United States While recognizing that capitalism has been successful in a number of countries the authors point out that overly simplistic policies advocating an unfettered capitalism ignore too large a range of issues central to the formation of any moral economic system Viewing capitalism as simply one of a number of economic systems Leonard and Mark Silk address such issues as the obligation of the rich to the poor the responsibility of the state to insulate its citizens from market fluctuations the responsibility of present generations to provide for future ones and whether economic systems can set the proper extent and limits of individual rights and freedoms An important concise thought provoking book this is the last book Leonard Silk wrote before his death late last year and has been completed here by his son Mark *The New Statesman*, 1914 *China* Dimitri Cavalli, 2002

**Demystifying Chinese Management** Malcolm Warner, Chris Rowley, 2015-10-14 Today with a new leadership in place the People's Republic of China enters a challenging new phase as an emerging economic superpower The Chinese economy has dramatically changed over the three decades since Deng Xiaoping launched his economic reforms in 1978 It has been transformed from a command economy dominated by state owned enterprises to a market socialist economy with a wide range of ownership forms both public and private In turn its managers and management have correspondingly undergone a major sea change This edited collection attempts to demystify Chinese management highlighting recent research into these significant changes and their implications in a wide range of business enterprises both in China and overseas It points to the strategic challenges and issues in terms of realizing the managerial version of the Chinese Dream The topics covered include business schools in China corporate social responsibility financial services impression management international human resource management international competitive strategy choices internationalization of

firms and the role of science parks The book was originally published as a special issue of Asia Pacific Business Review  
*The Christian Century* ,1922      **The China-led Belt and Road Initiative and its Reflections** Mehdi Parvizi  
Amineh,2022-07-12 This book analyzes the origins and the impacts of China s Belt and Road Initiative BRI on diplomacy  
economy trade investment finance and security among selected host countries and regions in Asia Africa and the European  
Union By examining the geopolitical economy of BRI activities it concisely describes the impact of the rise of China and its  
BRI policy strategy on the reshaping of world order and global governance This volume explores the BRI by addressing  
several key questions including Why did the Chinese leadership set up the BRI What are the activities of BRI projects in the  
participating countries and related regions What are the challenges to the successful implementation of the BRI in the  
various countries and regions Moreover through its analysis of the abovementioned questions it provides novel contributions  
to the ongoing scholarly debates between Chinese and non Chinese scholars among others the debate surrounding the rise of  
China and its impact on global governance Featuring an extensive variety of expert contributors this study will be an  
essential reading for students and scholars of International Relations and Global Political Economy as well as Chinese politics  
and those with an interest in the Belt and Road Initiative more broadly      China's Global Energy Expansion Xiaohan  
Gong,2024-10-03 Should Chinese energy investments be excluded from the liberal economic system based on geopolitical  
assessments only This book explores the potential regulatory control by the Chinese government over foreign energy  
investments to achieve their perceived strategic objectives Host states in which Chinese energy companies make investments  
have increasingly opposed Chinese energy investments in their national security reviews based on concerns that these  
investments have strategic objectives The book analyses China s investment related law regulations and energy policies to  
examine how overseas energy investment making is governed The book also explores the role of the Chinese government in  
energy investment promotion and protection Uniquely the examination of China s potential regulatory control provides an  
objective criterion rather than geopolitical considerations for host states to assess the nature of Chinese energy investments  
The book helps readers to open the black box of Chinese energy investments from a regulatory perspective It is a useful  
resource for researchers as well as practising lawyers assisting their Chinese clients through national security reviews or  
when trying to determine whether China s SOEs can bring cases before investor state arbitration tribunals      **China**
