urban decline *Place Matters* Peter Dreier, John H. Mollenkopf, Todd Swanstrom, 2004 Analyzes the problematic trends facing America's cities and older suburbs and challenges us to put America's urban crisis back on the national agenda

Revitalizing Urban Neighborhoods William Dennis Keating, Norman Krumholz, Philip Star, 1996 Since the 1950s and the advance of urban renewal local governments and urban policy have focused heavily on the central business district. However, such development has all but ignored the inner city neighborhoods that continue to struggle in the shadows of high rise America. This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development. Together they show how urban neighborhoods can and must be preserved as economic, cultural, and political centers.

The Practice of Local Government Planning Charles Hoch, Linda C. Dalton, Frank S. So, 2000 This classic ICMA green book is filled with practical guidance on a broad range of issues that planners are likely to encounter whether they work in inner cities, older suburbs, rural districts, or small towns. In addition to covering the latest planning trends and the impact of technology, diversity, and citizen participation, this text gives complete coverage of basic planning functions such as housing, transportation, community development, and urban design.

Social Justice and Local Development Policy Robert Mier, 1993-07-09 The inside story of the Chicago Development Plan has been described as the most aggressive model thus far for running a city for the benefit of its people. In this book Robert Mier, the chief architect and manager of Chicago's development agenda, makes a valuable contribution to the debate on local approaches to economic regeneration, proving that the Chicago experience provides important lessons for all cities.

Customer Service in Local Government Bruce W. McClendon, 1992 **Theories of Local Economic Development** Richard D. Bingham, Robert Mier, 1993-08-25 Assembling the leading thinkers and practitioners in the field of economic development, *Theories of Local Economic Development* places state-of-the-art theoretical positions on such important issues as inner city development, rural development, technological innovation, and rebuilding economic infrastructure. To accomplish this task, the contributors skillfully incorporate illustrative case material. Chapters draw on the disciplines of economics, geography, regional science, urban planning, sociology, political science, and public administration. The pivotal assumption behind this book is that research should and can lead to general statements about economic development. As a result, scholars of economics and public finance, public administration, political science, urban studies, policy studies, and development studies will appreciate this invaluable resource. Bingham and Mier have compiled an interesting study of local economic development in the United States by bringing together a series of papers that review aspects of economic growth from across a range of methodological perspectives. The study is to be recommended to

anyone wishing to gain a general understanding of current theoretical debate in the United States to economic development and may provide readers with some useful ideas on possible methodological approaches to understanding economic development in Britain Local Government Studies The individual contributions are generally sound well written reviews of the various theories relating to their particular subject areas The study is designed to have a common theme of reviewing problems and succeeds in its aim by providing a far more consistent study than many other collections of papers The study is therefore to be recommended to anyone wishing to gain a general understanding of current theoretical debate in the United States and may provide readers with some useful ideas on possible methodological approaches to understanding economic development in Britain Local Government Studies Planning for diversity and multiplicity : a new agenda of the world planning community ,2006 Abstract of the proceedings of the international conference presented in the 2006 World Planning Schools Congress that address a wide range of topics with an emphasis on urban planning and redevelopment Citistates Neal R.
