**Making Farmers' Co-Operatives Work** Tushaar Shah,1995 An alternative approach to the study of co operatives is offered in this volume The author presents a new theoretical framework to understand the performance and limitations of a village co operative based on a review of 50 case studies This model has advantages over existing approaches because of its emphasis on central tendencies rather than on extremes for its explanation of both successes and failures and for bringing the members of co operatives to the centre of enquiry thus offering them a guide for positive action
