Making Geometry Come Alive Alfred S. Posamentier,2000-07-22 Activities in Geometry is a set of versatile enrichment exercises that covers a very broad range of topics in geometry Euclidean post Euclidean and non Euclidean Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to students and show them that there is much more to geometry than proving theorems To demonstrate this aspect of geometry it is necessary for the investigation to be quite different from what students encounter in their basal texts different in both substance and form Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject
