## **Making Global Trade Work For People:**

Making Global Trade Work for People Kamal Malhotra,2012-03-29 The world's trade regime is promoted by international agencies and most governments as the best way to lift the poor out of poverty and achieve sustainable development. But does it contribute to human development or not? This reassessment looks in detail at the way it has worked under the GATT and under the World Trade Organization and analyses how it is working and how it can be improved. The book aims to make major contribution to the debates surrounding globalization and the impact of trade on the poor on social stability and on the environment. It is intended to provide a benchmark for future policy discussion and analysis.

**Policy Matters** Jose Antonio Ocampo, Jomo K.S., Sarbuland Khan, 2007 International Finance and Development offers a comprehensive survey of the major financing issues influencing economic development since the historic Monterrey Consensus of the International Conference on Financing for Development in 2002. As most recent international private capital flows have been unlikely to significantly enhance new productive investments in the developing countries it is necessary to design appropriate mechanisms to ensure they contribute to development. However recent trends in official development financing offer some grounds for optimism although much more needs to be done. External debt problems of many developing countries especially the least developed countries seem likely to continue to constrain their prospects for development. The final part on systemic issues highlights new concerns and the modest progress in ensuring that the international monetary and financial system better serves economic growth and development throughout the world especially in the developing countries.

,2006    **Ecosystems and Human Well-Being** Kanchan Ratna Chopra, 2005-12-14 With the knowledge of possible outcomes what kind of actions should we take? The Millennium Ecosystem Assessment scored 74 response options for dealing with declines in ecosystem services and biodiversity and managing drivers such as climate change and nutrient loading. This third volume in the MA series analyzes the track record of past policies and the potential of new ones. The challenge of reversing the degradation of ecosystems while meeting increasing demands for their services can be met only with

significant policy and institutional changes. However, a difficult set of obstacles stand in the way. Policy makers must keep in mind that there are both trade offs and synergies between human well being, ecosystems and ecosystem services and that decisions regarding these tradeoffs are difficult and often contentious. The Responses volume ultimately establishes which policy options have the greatest chance to overcome the obstacles and generate positive outcomes. It will serve as an invaluable guide to the creation of stronger policy frameworks for the future.

**Neoliberalism, Globalization, and Inequalities** Vicente Navarro, 2007

Since U.S. President Reagan and U.K. Prime Minister Thatcher a major ideology under the name of economic science has been expanded worldwide that claims that the best policies to stimulate human development are those that reduce the role of the state in economic and social lives, privatizing public services and public enterprises, deregulating the mobility of capital and labor, eliminating protectionism and reducing public social protection. This ideology, called neoliberalism, has guided the globalization of economic activity and become the conventional wisdom in international agencies and institutions such as the IMF, World Bank, World Trade Organization and the technical agencies of the United Nations including the WHO. Reproduced in the Washington consensus in the United States and the Brussels consensus in the European Union, this ideology has guided policies widely accepted as the only ones possible and advisable. This book assembles a series of articles that challenge that ideology. Written by well known scholars, these articles question each of the tenets of neoliberal doctrine showing how the policies guided by this ideology have adversely affected human development in the countries where they have been implemented.

**Development and the Rule of Law in the WTO** Intan Murnira Ramli, 2008

International economic law has been evolving toward an unprecedented degree of institutionalism and supranational legal authority expressed through the availability of legalistic and more coercive mechanisms to develop international legal obligations enforceable upon states. This book will explore the transparency of the Dispute Settlement Mechanism (DSM) within the World Trade Organization (WTO), the level of participation of the WTO members especially those of the developing and the least developed countries and the attitude of the DSM in relation to the issue of development.
