Making Peace With The Planet:

Making Peace with the Planet Barry Commoner, 1992-03-01 **Making Peace with the Earth** Jérôme Bindé, 2007
Without immediate action to combat global warming we face losing 5 to 20 per cent of the world's Gross Domestic Product GDP. Our biosphere is in jeopardy: increased desertification, deforestation, air and soil pollution, dwindling biodiversity, water crises and the degradation of the oceans. A new approach to our economy is needed: one that fosters less material forms of production, reduces superfluous consumption and wastes less raw material. We have to create and implement new styles of development that without halting growth spare the planet and preserve biodiversity. It is time as this volume proposes for humanity to make a new pact, a natural contract of co-development with the planet. UNESCO is actively involved in this debate as reflected in its 21st Century Talks series which open a forum for discussion on key issues of the future. Publisher's description **Making Peace with the Earth** Vandana Shiva, 2013-03-06 One of the world's most prominent radical scientists Vandana Shiva demolishes the myths propagated by corporate globalisation in its pursuit of profit and power, revealing the devastating environmental impact of corporate capitalism. Shiva argues that consumerism lubricates the war against the earth and that corporate control violates all ethical and ecological limits. She takes the reader on a journey through the world's devastated eco-landscape: one of genetic engineering, industrial development and land grabs in Africa, Asia and South America. She concludes that exploitation of this order is incurring an ecological and economic debt that is unsustainable. **Making Peace with the Earth** outlines how a paradigm shift to earth-centred politics and economics is our only chance of survival and how collective resistance to corporate exploitation can open the way to a new environmentalism. **Making Peace with the Earth** Jérôme Bindé, 2007 Without immediate action to combat global warming we face losing 5 to 20 per cent of the world's Gross Domestic Product GDP.
