COBBAN,1969      National Self-Determination and Justice in Multinational States Anna Moltchanova,2009-08-28 Substate nationalism especially in the past fifteen years has noticeably affected the political and territorial stability of many countries both democratic and democratizing Norms exist to limit the behavior of collective agents in relation to individuals the set of universally accepted human rights provides a basic framework There is a lacuna in international law however in the regulation of the behavior of groups toward other groups with the exception of relations among states The book offers a normative approach to moderate minority nationalism that treats minorities and majorities in multinational states justly and argues for the differentiation of group rights based on how group agents are constituted It argues that group agency requires a shared set of beliefs concerning membership and the social ontology it offers ensures that group rights can be aligned with individual rights It formulates a set of principles that if adopted would aid conflict resolution in multinational states The book pays special attention to national self determination in transitional societies The book is intended for everyone in political philosophy and political science interested in global justice and international law and legal practitioners interested in normative issues and group rights

Cultural Identity and the Nation-state Carol Gould,Pasquale Paquino,2001

In this collection several distinguished political philosophers consider alternative models of the recognition of diverse cultures and the significance of cultural and national identity within democratic societies The impact of this recognition for conceptions of citizenship and the supposed neutrality of the democratic state is examined in the framework of economic and political globalization on the one hand and the widespread assertion of cultural and ethnic differences on the other The tension between the recognition of diverse cultures and universal frameworks of human rights is discussed as are the idea of national self determination and the new forms of democratic and civic institutions that may be required in order to deal with present

political conflicts    **National Minorities and the European Nation-states System** Jennifer Jackson Preece,1998 The collapse of Yugoslavia Czechoslovakia and the Soviet Union has resulted in a proliferation of discontented national minorities Thus the possibility for destabilizing ethnic conflict has become acute National minorities have accordingly emerged as a major focus of international relations in post Cold War Europe Jennifer Jackson Preece s powerful new study offers an innovative analysis of these developments Scrutinizing them within the historical context of changing practices and evolving norms she reveals that the European national minority question is nothing new rather its foundations extend deep into contemporary history Moreover the problem is intrinsically derivative of the nation states system itself a system which potentially intensifies minority disaffection Examining these issues against the backdrop of relevant treaties diplomatic negotiations and international practices Jackson Preece presents the definitive assessment of the fate of national minorities in the European states system    *China from Empire to Nation-State* Hui Wang,2014-10-14 This translation of the

Cordell,2018-02-02 In a world in which change is constant the principle of self determination is important Through collective acts of self determination nations exercise the right to govern themselves At present the nation state system with which we are familiar faces several challenges In Western Europe sub state nationalism is on the rise In the Middle East and North Africa the state system bequeathed by former colonial powers faces increasing threats from pan Islamist movements Overall the established order faces unprecedented uncertainties The scholars who have contributed to this volume assess the merits limitations and trajectories of self determination in the twenty first century pointing to the paradoxes and anomalies that are encompassed by what at first sight is a simple and seductive concept From the perspective of the twenty first century and informed by a wealth of experience each of the contributors to this volume offers some valuable and intriguing observations on the future of self determination and the movements its call engenders This book was published as a special issue of

Tanya Karina Heurich,1999    **Self-Determination without Nationalism** Omar Dahbour,2012-12-07 How do groups be they religious or ethnic achieve sovereignty in a postnationalist world In Self Determination without Nationalism noted philosopher Omar Dahbour insists that the existing ethics of international relations dominated by the rival notions of liberal nationalism and political cosmopolitanism no longer suffice Dahbour notes that political communities are an ethically desirable and historically inevitable feature of collective life The ethical principles that govern them however especially self determination and sovereignty require reformulation in light of globalization and the economic and environmental challenges of the twenty first century Arguing that nation states violate the principle of self determination Dahbour then develops a detailed new theory of self determination that he calls ecosovereignty Ecosovereignty defines political community in a way that can protect and further the rights of indigenous peoples as well as the needs of ecological regions for a sustainable form of development and security from environmental destruction In the series Global Ethics and Politics edited by Carol Gould

Is the Nation an Outdated Concept?** Timo Wilhelm Rang,2016-10-26 Essay from the year 2008 in the subject Cultural Studies East European Studies grade 1 0 Otto von Guericke University Magdeburg Institut f r fremdsprachliche Philologien course Introduction to Cultural Studies language English abstract On the following pages I will try to point out the key role nations still play today What one associates with a nation forms the national identity which is for many maybe subconsciously a crucial element of the individual identity In my opinion nations will always strive for nation states as they guarantee most reliably the protection of national and therefore personal interests such as cultural determination security political self determination and financial and economic prospect Kosovo is a recent example where the denationalisation described in the paragraph above seems to be inversed The former Yugoslavian province has become Europe s youngest state not only chronologically but also demographically What motivates this young generation to stand in for a nation that has so little to offer to them I will deal

with the two sides of nationalism and describe how a moderate sense of nationality radicalised and drove the Balkans into the Kosovo crisis Despite the negative consequences overreaching nationalism can bring about I will talk about the necessity of national identities and explain why the nation is not an outdated concept
