National Interests The Multinational E:

Multinationals and the National Interest United States. Congress. Office of Technology Assessment,1993 *The Multinational Corporation and the National Interest* Robert Gilpin,1973 National Interest and International Aviation Erwin von den Steinen,2006-01-01 Many of the problems and opportunities facing society today are determined by issues of mobility Access to people products information and resources has emerged as a priority in the foreign policies of most states Inevitably considerations of national interest have played a central role in the structure and operations of the international aviation system Meanwhile air transport has been a catalyst for the phenomenon of globalization This first in depth exploration of the vital relationship between aviation policy and national interest in todays global economy focuses on those areas of concern where the international community has common ground or where conflicts of interest are most likely to arise Revealing deeply informed perspectives gained from decades of distinguished public service in many areas of aviation policy Erwin von den Steinen reviews the rules that govern the conduct of commercial air services between nations and considers the prospects of aviation in the 21st Century He explains how timely understanding of national interest can provide a context for global and local policy to connect and why the international aviation system is vital for the peaceful and sustainable development of modern states and societies With such insights and powerful practical recommendations von den Steinens analysis will be of enormous value to those concerned with air transport from technical research and design to the highest levels of government as well as to lawyers and academics in international law and relations and a tour of the major issues in international aviation law and policy under the guidance of an authentic homme engageand Ultimately this book is the work of someone who deeply appreciates the aviation industry both at its technical level that of its often frustrating machinations of law and policy and also at the emotional level of a special business that exemplifies freedom and imagination like few others do and Brian F Havel and The Introduction has one of the best free flowing leads to a book detailing the politics of aviation and diplomacy I have come acrossand I commend this book to lawyers diplomats and students of aero politics and lawand I would prescribe this book to my graduate students as compulsory reading for their course in Aero political and legal Environment and Dr Ruwantissa Abeyratne "Who is Us?"--national Interests in an Age of Global Industry United States. Congress. Joint Economic Committee,1991 **The International Economy and the National Interest** Irvin Millman Grossack,1979 **Defining the National Interest** Peter Trubowitz,1998-02-17 The United States has been marked by a highly politicized and divisive history of foreign policy making Why do the nation s leaders find it so difficult to define the national interest Peter Trubowitz offers a new and compelling conception of American foreign policy and the domestic geopolitical forces that shape and animate it Foreign policy conflict he argues is grounded in America s regional diversity The uneven nature of America s integration into the world economy has made regionalism a potent force shaping fights over the national interest As Trubowitz shows politicians from different parts of the country have consistently

sought to equate their region's interests with that of the nation. Domestic conflict over how to define the national interest is the result. Challenging dominant accounts of American foreign policy making. Defining the National Interest exemplifies how interdisciplinary scholarship can yield a deeper understanding of the connections between domestic and international change in an era of globalization.

Balancing the National Interest National Academy of Sciences, National Academy of Engineering, Institute of Medicine, Committee on Science, Engineering, and Public Policy, Panel on the Impact of National Security Controls on International Technology Transfer, 1987-02-01. The U.S. national security export controls system which was instituted to impede Soviet acquisition of high technology from the West is both necessary and appropriate. Balancing the National Interest provides a thorough analysis of this controls system examining the current system of laws, regulations, international agreements and organizations that control the international transfer of technology through industrial channels. Foreign Affairs calls it the best on the subject to have been published in the 40 years that the United States has exercised controls on exports that might add to Soviet power.

Examines cyberlaw topics such as cybercrime and risk management, electronic trading systems of securities, digital currency regulation, jurisdiction and consumer protection in cross border markets and international bank transfers.

American Multinationals and American Interests C. Fred Bergsten, Thomas Horst, Theodore H. Moran, 1978. Monograph of economic analysis and economic models illustrating the effects of multinational enterprise on the domestic economy and foreign policy of the USA. Examines the impact of direct foreign investments on taxation, competition, employment, access to foreign raw materials, etc. and seeks to provide a foundation for sound government policies.

References and statistical tables. **National Interests and the Multinational Enterprise** Jack N. Behrman, 1970. Monograph on the impact of multinational enterprises on government policies of host countries with particular reference to the role of USA foreign investment in Western European and Canada. Examines the reactions to the potential loss of sovereignty by host governments and fears of interference by the US government and assesses the results of alternative economic policy prescriptions. Bibliography pp 193 and 194. References and statistical tables.

Multinationals in Confrontation, 1975. Conference report on the economic, political and social role of multinational enterprises in the context of global international relations among states. Conference held in Geneva 1975 September 23 to 26.

An Introductory Guide to EC Competition Law and Practice Valentine Korah, 1994. **National Interests And Presidential Leadership** Donald E. Nuechterlein, 2019-04-10. Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available. A new approach to defining national interest forms the basis for this study of presidential decisions on U.S. involvement in foreign wars. Professor Nuechterlein looks at various crisis situations to

determine what defense economic world order and ideological interests are at stake he identifies sixteen cost risk and value factors that affect the U S view of which interest is most vital in a given situation In any dispute it is the interest that is considered vital too important to compromise that is the key element in crisis decisions Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson Roosevelt Truman Johnson and Nixon perceived the national interest when making their decisions to begin or extend U S war involvement He assesses the value of National Security Council participation in the decision making process and presents case study analyses of three imminent U S foreign policy concerns Quebec s possible separation from Canada the Panama Canal Treaty and the potential for race war in South Africa with an epilogue on the challenges facing Carter The author suggests that the most important U S national interest in the future will be economic with energy conservation a top priority **The Multinational Corporation** Helga Hernes,Helga Maria Hernes,1977 Annotated bibliography on the role of multinational enterprises in international relations and politics

The Record and National Advocate of Insurance ,1918 **The National Interest** ,2007 **States and Companies** Howard Lax,1988-11-15 Because political events can determine the success or failure of an investment abroad transnational companies must make every effort to analyze political risks as part of the decisionmaking process States and Companies written especially for students of international business and executives of transnational companies presents a conceptual framework for the analysis of political risk Although the author focuses his study on the international oil industry his explanatory model of political risk is applicable to most transnational companies Lax s study is important because it focuses on developing a context for understanding political risk rather than simply offering a predictive methodology He provides the theoretical groundwork for this understanding by explaining political risk in terms of a broader theory of interaction between host states and transnational corporations The inherent conflict of interests and issues hierarchies between these two actors Lax argues is the root cause of political risk *International Conference on International Economy and Competition Policy* Michiko Ariga,1973
