## **Nationalism And Historiography:**

**Writing the History of Nationalism** Stefan Berger, Eric Storm, 2019-09-19 What is nationalism and how can we study it from a historical perspective Writing the History of Nationalism answers this question by examining eleven historical approaches to nationalism studies in theory and practice An impressive cast of contributors cover the history of nationalism from a wide range of thematic approaches from traditional modernist and Marxist perspectives to more recent debates around gender postcolonialism and the global turn in history writing This book is essential reading for undergraduate students of history politics and sociology wanting to understand the complex yet fascinating history of nationalism

**Nationalism, Historiography, and the (re)construction of the Past** Claire Norton, 2007 The essays in this collection explore both how the employment of nation state dominated discourses have caused a re imagination of the past and how the past has been re constructed to accord with nationalist agendas Although other works have considered in general terms how nations are imagined this collection takes a different stance and specifically focuses on how the past is used in such imaginations This collection was conceived in an interdisciplinary spirit drawing insights from art history intellectual history literature archaeology heritage studies political science and film studies The authors combine a sophisticated theoretical approach with illuminative case studies from all across the globe including the Balkans South Africa Rwanda the Yemen Italy Turkey Greece and Uzbekistan

**Nationalism** Paul Lawrence, 2016-09-17 Massive changes have taken place in the way nations and nationalism are thought about From being viewed enthusiastically by historians as a force for beneficial change before the First World War today appeals to national sentiment are viewed as far more complex and problematic This book looks at how historians and others such as sociologists and political theorists have explained the development and enduring importance of national identities from c 1850 to the present day It compares and contrasts a wide range of different theories and will be useful for anyone wanting to equip themselves with a theoretical understanding of why we live in nations and why we invest them with such significance

*National History and New Nationalism in the Twenty-First Century* Niels F. May, Thomas Maissen, 2021-06-17 National history has once again become a battlefield In internal political conflicts which are fought on the terrain of popular culture museums schoolbooks and memorial politics it has taken on a newly important and contested role Irrespective of national specifics the narratives of new nationalism are quite similar everywhere National history is said to stretch back many centuries expressing the historical continuity of a homogeneous people and its timeless character This people struggles for independence guided by towering leaders and inspired by the sacrifice of martyrs Unlike earlier forms of nationalism the main enemies are no longer neighbouring states but international and supranational institutions To use national history as an integrative tool new nationalists claim that the media and school history curricula should not contest or question the nation and its great historical deeds as doubts threaten to weaken and dishonour the nation This book offers a broad international overview of the rhetoric contents and contexts of the rise of these renewed

national historical narratives and of how professional historians have reacted to these phenomena The contributions focus on a wide range of representative nations from around all over the globe      **The Nation in History** Anthony D.

Smith,2014-01-23 In this thought provoking new book Anthony Smith analyses key debates between historians and social scientists on the role of nations and nationalism in history In a wide ranging analysis of the work of historians sociologists political scientists and others he argues that there are three key issues which have shaped debates in this field first the nature and origin of nations and nationalism second the antiquity or modernity of nations and nationalism and third the role of nations and nationalism in historical and especially recent social change Anthony Smith provides an incisive critique of the debate between modernists perennialists and primordialists over the origins development and contemporary significance of nations and nationalism Drawing on a wide range of examples from antiquity and the medieval epoch as well as the modern world he develops a distinctive ethnosymbolic account of nations and nationalism This important book by one of the world s leading authorities on nationalism and ethnicity will be of particular interest to students and scholars in history sociology and politics

**Modern Nationalism and the Making of a Professional Historian** Shih-chieh Su,2014 This new study re examines the relationship between the beginnings of the modern historical profession and the emergence of the nation state in the nineteenth century The monograph analyses the founding father of modern historiography Leopold von Ranke and his evolution as an historian his self perception and his increasingly dominant perceptions of the historian s craft and role in society and politics Su particularly focuses on the tension between a commitment to an objective representation of the past and the allegiance to a nation The approach suggests an original and important revision of the conventional view of Ranke as an historian and perhaps more importantly of the origins of the modern historical profession This revision also suggests that some of the conventional attacks on the alleged fixation on objectivity of the Rankean school were are misplaced on the one hand and that other hand the historical profession has been from its very beginnings locked in battle with itself over its relationship with a specific nation culture and race its claim of universal meaning and implication and its assertion of truthfully telling the story of the past Su demonstrates that many if not in one way or the other all of the dilemmas and conundrums that confront historians today were already present in the making of the profession and more or less clearly in the minds of such major figures as von Ranke      *Nationality and History* Henry Morse Stephens,1916      **The Plain and Noble Garb of Truth** Eileen K. Cheng,2008

American historians of the early national period argues Eileen Ka May Cheng grappled with objectivity professionalism and other modern issues to a greater degree than their successors in later generations acknowledge Her extensive readings of antebellum historians show that by the 1820s a small but influential group of practitioners had begun to develop many of the doctrines and concerns that undergird contemporary historical practice The Plain and Noble Garb of Truth challenges the entrenched notion that America s first generations of historians were romantics or propagandists for a struggling young nation Cheng engages with the works of well known early national

historians like George Bancroft William Prescott and David Ramsay such lesser known figures as Jared Sparks and Lorenzo Sabine and leading political and intellectual elites of the day including Francis Bowen and Charles Francis Adams She shows that their work which focused on the American Revolution was often nuanced and surprisingly sympathetic in its treatment of American Indians and loyalists She also demonstrates how the rise of the novel contributed to the emergence of history as an autonomous discipline arguing that paradoxically early national historians at once described truth in opposition to the novel and were influenced by the novel in their understanding of truth Modern historians should recognize that the discipline of history is itself a product of history says Cheng By taking seriously a group of too often dismissed historians she challenges contemporary historians to examine some ahistorical aspects of the way they understand their own discipline **Nationalism and History** Simon Dubnow,1958 **Nationhood from Below** Maarten Van Ginderachter,M. Beyen,2011-12-12 Nationalism was ubiquitous in nineteenth century Europe Yet we know little about what the nation meant to ordinary people In this book both renowned historians and younger scholars try to answer this question This book will appeal to specialists in the field but also offers helpful reading for any college and university course on nationalism **Essays on Kurds** Amir Hassanpour,2020-02-15 The essays in this collection offer robust theoretical analysis of language and cultural rights class and gender policy and politics history and historiography nation and nationalism and Marxism They continue to remain original to a vast array of debates and contestations in these areas The book includes unpublished pieces and some key contributions that are most relevant to the contemporary debates on theory and method of nation nationalism and the struggle of national minorities for sovereignty cultural and political rights Each chapter provides original data and are written over a span of decades but significantly they offer a radical break with the colonial orientalist and nationalist traditions of knowledge production This book is an exemplary exploration of nation and nationalism in a Marxist dialectical historical materialism **Nation and Ethnicity** Julia C. Schneider,2017-03-13 Winner of the Foundation Council Award of the Georg August University of G ttingen Public Law Foundation in the category of Outstanding Publications of Young Scientists 2017 In Nation and Ethnicity Chinese Discourses on History Historiography and Nationalism 1900s 1920s Julia C Schneider give an analysis of nationalist and historiographical discourses among late imperial and early republican Chinese thinkers In particular she researches their approaches towards non Chinese people within the Qing Empire and the question on how to integrate them into a Chinese nation state Non Chinese people mainly Manchus Mongols Tibetans and Turkic Muslims Uyghurs have not been considered as important factors in the history of early Chinese nationalism so far But Chinese nationalist and historiographical discourses tell not only a lot about the Chinese image of the Other but also shed new light on the images of the Chinese Self and its assumed ability to assimilate and integrate other ethnicities *Nationhood and Politicization of History in School Textbooks* Gorana Ognjenović,Jasna Jozelić,2020-02-15 This book explores how school history textbooks are used to perpetuate nationalistic policies within divided regions Exploring the

divide and rule politics across ex Yugoslav successor states the editors and contributors draw upon a wide range of case studies from across the region Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that are creating their present By promoting nationalistic politics in such media textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict This edited collection will appeal to scholars of educational media history education and post conflict societies

**The Construction of History and Nationalism in India** Sylvie Guichard, 2010-06-25 Most studies on nations and nationalism argue that history or more precisely a common past is crucial for the process of national identity building However the existence of one or more concurrent narratives for the construction of this identity is often not accounted for and there are cases where the common past or a collective memory is no longer shared This book centres on the construction elaboration and negotiation of the narratives that have become official history in India These narratives influence politics and the representation of the nation Depending on the chosen definition of the nation over 160 million Muslim Indians are either included or excluded from the nation and considered as foreigners from inside The author shows that beyond the antagonism of two representations of history two conceptions of the Indian nation secular and Hindu nationalist confronted each other during the history textbook controversy between 1998 and 2004 The diverging elements of the two discourses are underlined and surprising similarities are uncovered Yet in contemporary India this convergence remains overshadowed in political debates as the definition of the political has been shaped by the opposition between these two visions of the nation This book analyzes and questions the conception of the school textbook as a tool of national construction and more generally highlights the complexity of the link between historiography nation state and nation building

*Nation and the Writing of History in China and Britain, 1880-1930* Asier Hernández Aguirresarobe, 2022-08-19 Nation and the Writing of History in China and Britain explores through a comparative approach the reception of the nationalist worldview and its effects on the practice of history in China and Britain This book proposes that nationalism rather than a political doctrine is a way of making sense of the world which results from the combination of a set of definite assumptions The work analyzes how each one of these premises was accepted and negotiated by literati intellectuals historians and other scholars in the late nineteenth and early twentieth centuries The results of this research showcase how the reception of the new nationalist worldview crucially affected images of the past the present and the future in both societies and decisively framed cultural social and political debate In addition they likewise evidence the fundamental role that historical narratives play in the crystallization of national identities This book is perfect for readers interested in China and Britain during this time period but also to anyone attracted to new ways of conceiving nationalism and its role in our world

**Making History in Iran** Farzin Vejdani, 2015 This title provides a novel perspective on the relationship between institutions the position of individual historians in relation to the state and the contours of specific interpretations of

the past in late nineteenth and early twentieth century Iran It advances debates about Iranian nationalist historiography beyond a consideration of a few great men by discussing the complex sets of interactions among a wide cross section of Iranian society scholars schoolteachers students intellectuals feminists government and poets who were crucial in defining Iranian nationalism Nationalism Paul Lawrence,2004 **Narrating the Nation** Stefan Berger,Linas Eriksonas,Andrew Mycock,2008-10-01 A sustained and systematic study of the construction erosion and reconstruction of national histories across a wide variety of states is highly topical and extremely relevant in the context of the accelerating processes of Europeanization and globalization However as demonstrated in this volume histories have not of course only been written by professional historians Drawing on studies from a number of different European nation states the contributors to this volume present a systematic exploration of the representation of the national paradigm In doing so they contextualize the European experience in a more global framework by providing comparative perspectives on the national histories in the Far East and North America As such they expose the complex variables and diverse actors that lie behind the narration of a nation

*Historiography in Saudi Arabia* Jörg Matthias Determann,2013-10-25 Saudi Arabia is generally and justifiably viewed as a country with the fewest democratic institutions and the weakest traditions of pluralism in the world It is therefore surprising to learn that at least in one corner of the Saudi world there is a plurality of voices Jörg Matthias Determann brings this element to light by analysing an important field of cultural activity in Saudi Arabia historical writing By exploring the emergence of a plurality of historical narratives in the absence of formal political pluralism Determann seeks to paint a more nuanced picture of Saudi Arabia than has previously been drawn Since the 1920s local tribal Shi'i and dynastic histories have contributed to a growing plurality of narratives diverging from and contesting the histories which focus on the royal family Instead they have emphasized the communities historical independence from the House of Saud or asserting the communities importance in Saudi national history In addition to this during the 1970s distinct social and economic histories began to be developed new narratives which have described important historical events evolving from wider social and economic factors rather than resulting from the actions of individual rulers or communities Paradoxically this happened because of the expansion of the Saudi state including state provision of mass education A variety of previously illiterate and relatively poor sections of Saudi society including former Bedouin were thus empowered to produce histories which while conformist for the most part also provided a vehicle for dissenting voices Furthermore Determann argues that this proliferation of alternative histories is also due to globalizing processes such as the spread of the internet It is through this phenomenon that narrative plurality has been facilitated by putting Saudi historians in contact with different ideologies methodologies and source material from abroad In challenging the widely held perception of Saudi Arabia as an irredeemably closed and monolithic society *Historiography in Saudi Arabia* provides a deeper understanding of modern Arab historiography the Saudi state and education and scholarship in the Middle East Nations and Nationalities in Historical Perspective Guðmundur
