## New Trends In Vaccines:

Compensation for Vaccine-related Injuries ,1980    Compensation for vaccine-related injuries : a technical memorandum ,1980    New Trends and Developments in Vaccines A. Voller,C.M. Abraham,2012-12-06 It was not too long ago that many physicians and biomedical scientists felt that the era of vaccines for protecting mankind against infectious disease was coming to an end During the 1940s and 50s the widespread use of newly developed antibiotics and antimicrobial chemotherapeutic agents suggested a new era in medicine i.e the control and eventual elimination of all infectious diseases at least those caused by bacteria by chemical means The magic bullet proposed by Paul Ehrlich in the early 1900s seemed to be the method of choice for controlling infection However it is now quite evident that those high expectations were unwarranted Although many acute infections especially those caused by pyogenic cocci have been controlled by antibiotics it is quite evident that infectious diseases even those caused by bacteria still are a major problem Thus the old standby of preventative vaccination is making a strong comeback not only for viral but also for bacterial infections However except for a relatively small number of viral diseases and those bacterial diseases due to toxin elaborated by microorganisms rather than invasion and replication of the microbe per se preventative vaccination still has not fulfilled the expectations of their proponents There has been a recent resurgence of interest concerning all aspects of vaccines not only their preparation and administration but also the nature and mechanism of the host immune response to the constituent micro organisms and their products    Vaccines Michael C. Burge,Don Nardo,1992 Traces the history of vaccines from the first vaccine to the work of Louis Pasteur to the hazards of immunization to vaccines today    Plotkin's Vaccines,E-Book Walter A.
