## Participation and Media Production Nico

Carpentier, Benjamin De Cleen, 2008 In an era when especially new media are celebrated for their participatory potential questions about the nature and intensity of these participatory processes seem to be superfluous But raising these questions pushes us into a critical mode towards the changes that have lead to the present day media landscape This volume TM s authors aim to activate this critical mode and reflect on the participatory nature of contemporary media organizations and products In order to stand even a remote chance to realize this objective and to critically unravel the societal role of participation we need to acknowledge that participation is a complex and contested notion covering a wide variety of meanings and practices that are converging into a hybrid of technologies genres and formats At the same time prudence is required as many of the empowering and transformative opportunities cover up a multitude of restrictions that deal with muting voices appropriations techniques of surveillance inequalities and exclusions This volume thus provides its readership with a set of analyses that reconcile the appreciation for the analogue and digital empowerment and emancipation with the critical analysis of their boundaries Participation and Media Production is the result of the intellectual work of the participants of the 2007 San Francisco Conference of the International Communication Association ICA

## Being a Young Citizen in Estonia Anne Kaun, 2013 The book gives an intriguing insight into how young people in Estonia twenty years after the establishment of democracy perceive their own role as citizens It does so in a theoretical framework that stresses the embeddedness of the civic experiences in a media dominated environment thus closely linking civic and media experiences

Based on the analysis of both qualitative interview data and a relatively new method of using the internet as a complementary tool for engaging with open ended diaries the study explores the extent to which young citizens experience the media as being interwoven with their everyday lives and in fact constitutive of their social reality as citizens With its particular focus on young Estonians i e on a generation that has been brought up in a context of rapid political economic and social change and that is well known for its fascination with new communication technologies the book is a valuable contribution to the growing international research on media and civic experiences

## **The Politics of News** Doris A. Graber, Denis McQuail, Pippa Norris, 2008 Books on journalists typically focus on the dynamics of the newsmaking process The Politics of News The News of Politics extends this

examination to explore the struggle between journalists political actors and the public for control of the news in democratic

countries The book shows how the news media function as an intermediary between governments and citizens as well as between political actors such as parties and interest groups and the public Essays present a diversity of views and are written by a distinguished group of authors that includes such luminaries as Jim Lehrer Kathleen Hall Jamieson Robert Picard and Andrew Kohut The Politics of News is policy oriented By diagnosing problems faced by those whose influence affects newsmaking in both existing and emerging democracies authors generate ideas about possible reforms Several chapters offer comparative analysis that offer students insight into the impact of cultural factors on newsmaking Accessible yet sophisticated this anticipated second edition covers significant issues surrounding political news ranging from the limits of press freedom during times of war and the implications of media concentration for democratic participation to the ingenious ways that governments and interest groups draw attention to their concerns

### **The Information Society**

Robin Mansell,2009 The information society refers to a constellation of developments arising from the growing use of communication technologies in the acquisition storage and processing of information and the role of information in supporting the creation and exchange of knowledge Research on information societies really began to take off in the 1970s when Daniel Bell wrote about the information age While there were earlier works that focused on the growing importance of information in the economy it was not until the mid 1990s and the spread of the Internet that this field of study experienced a huge expansion across a broad range of disciplines in the social sciences and beyond A critical mass of scholarship has now accumulated establishing the information society and information societies as a terrain of substance and complexity the exploration and understanding of which requires increasingly sophisticated navigation skills As research in and around the area continues to flourish as never before this new title in Routledge's Major Works series Critical Concepts in Sociology meets the need for an authoritative reference work to make sense of a rapidly growing and ever more complex corpus of literature and to provide a map of the area as it has emerged and developed over the last thirty years or so The Information Society is fully indexed and has a comprehensive introduction newly written by the editor which places the material in its historical and intellectual context It is an essential work of reference and is destined to be valued by scholars and students as well as policy makers and practitioners in the field as a vital one stop research resource Publisher's website
