**Viking Camps** Charlotte Hedenstierna-Jonson, IRENE GARCÍA LOSQUIÑO, 2023-07-13 This book is the coming together of several disciplines under the thematic umbrella of Viking Camps and provides the very latest research presented by the leading researchers in the field, making it the most comprehensive compilation of the phenomenon of Viking camps to date. Compiling the current state of research on encampments across the Viking world and their impact on their surroundings, this volume provides an all-encompassing analysis of their characteristics, functions, form, inner workings and interaction with the landscape and the local population. It initiates a wider discussion on the features and functions that define them, making it possible to identify and understand new sites, also broadening the geographical scope. Sites in Ireland, England, Sweden, Frankia and Iberia are presented and explored, allowing the reader to understand the camp phenomenon from a comparative, more inclusive perspective.

The combination of geographically bound case studies and in-depth analyses of specific themes such as economy, social structure, and military strategy, provides a comprehensive overview of Viking camp life. The book also explores the impact of these camps on the local communities and the broader Viking world, highlighting the complex interactions between the invaders and the invaded. The analysis is informed by the latest archaeological and historical research, providing a detailed understanding of the practicalities of camp life, such as food storage, waste management, and defense. The book also examines the social hierarchy within the camps, the roles of different individuals, and the ways in which camps were used for different purposes, such as as bases for raids, as temporary settlements, or as points of trade and exchange. Sharples,2019-12-19 The settlement at Bornais in the Western Isles of Scotland is one of the largest rural settlements known from the Norse period in Britain It spans the period from the fifth to the fifteenth century AD when the Atlantic seaboard was subject to drastic changes The islands were systematically ravaged by Viking raiders and then colonised by Norse settlers In the following centuries the islanders were central to the emergence of the Kingdom of Man and the Isles played a crucial role in the development of the Lordship of the Isles and were finally assimilated into the Kingdom of Scotland This volume explores the stratigraphic sequence uncovered by the excavation of Bornais mounds 2 and 2A The excavation of mound 2 revealed a sequence of high status buildings that span the Norse occupation of the settlement One of these houses constructed at the end of the eleventh century AD was a well preserved bow walled longhouse and the careful excavation and detailed recording of the floor layers has revealed a wealth of finds that provides invaluable insight into the activities taking place in this building The final house in this sequence is very different in form and use and clearly indicates the increasing Scottish influence on the region at the beginning of the thirteenth century The excavation of mound 2A provides an insight into the less prestigious areas of the settlement and contributes a significant amount of evidence on the settlement economy The area was initially cultivated before it became a settlement local and throughout its life a focus on agricultural activities such as grain drying and processing appears to have been important In the thirteenth century the mound was occupied by a craftsman who produced composite combs gaming pieces and simple tools The evidence presented in this volume makes a major contribution to the understanding of Norse Scotland and the colonisation of the North Atlantic in a period of dramatic transformations
