The Ashgate Research Companion to Modern Imperial Histories John Marriott,2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of

a specific empire while at the same time placing it within the complex patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire

Canadian Liberalism and the Politics of Border Control, 1867-1967 Christopher G. Anderson, 2012-11-17 Since 9 11 Canada's reputation as an inclusive country that takes in immigrants and refugees has been clouded by restrictive immigration policies increased interdiction and the detention of asylum seekers Moreover public debate over the arrival of non citizens especially those seeking entry through unofficial channels is now often framed within a security discourse that is used to justify a more restrictive approach These developments are not surprising in the current context but as Anderson illustrates they are also nothing new Canadian Liberalism and the Politics of Border Control sheds light on the long and complex history of Canada's efforts to control its borders Framing pivotal moments within a long standing but often overlooked debate over the rights of non citizens Anderson demonstrates that today's more restrictive approach reflects traditions deeply embedded within liberal democracies His insights into Canadian immigration and refugee history offer valuable lessons for understanding the nature of contemporary liberal democratic control policies

Lee, 2021-09-30 In Canada women's bodies are often at the centre of debates about religious pluralism multiculturalism and secularism Women have long played a critical role in building and maintaining diasporic religious communities and networks and they have also been catalysts for change and transformation within religious groups and the wider community Relation and Resistance explores the stories and lives of racialized women connected with religious diaspora communities in

Canada Contributors from across disciplines show how women are conceptualizing traditions in transformative ways challenging prevailing assumptions about diasporic religion as nostalgically entrenched in the past The collected essays include chapters on feminist and queer women thinking critically about Hindu and Muslim identities and beliefs and challenging anti Black racism and settler colonialism Afro Caribbean and M tis writers using literature to explore religion and belonging the impact of women s participation in Japanese Chinese and Pakistani transnational religious organizations and marriage migration and gender equality in the Punjabi Sikh and Malayali Christian communities The volume closes with a chapter exploring M tis diasporic experience and inviting readers to think critically about diasporic religion on Indigenous land An innovative and timely volume Relation and Resistance reveals that a deeper understanding of women s experiences of displacement migration race and gender is critical to the study of religion in Canada
