New Method Of Philosophy:

Discourse on a New Method Mary Domski, Michael Dickson, 2010-09-10 Addressing a wide range of topics from Newton to Post Kuhnian philosophy of science these essays critically examine themes that have been central to the influential work of philosopher Michael Friedman Special focus is given to Friedman's revealing study of both history of science and philosophy in his work on Kant Newton Einstein and other major figures This interaction of history and philosophy is the subject of the editors manifesto and serves to both explain and promote the essential ties between two disciplines usually regarded as unrelated

Nietzsche and Modern Times Laurence Lampert, 1993-01-01 This major work by Laurence Lampert provides a new interpretation of modern philosophy by developing Nietzsche's view that genuine philosophers set out to determine the direction of culture through their ideas and that they conceal the radical nature of their thought by their esoteric style From this Nietzschean perspective Francis Bacon and Ren Descartes can be considered the founders of modernity Lampert argues that Bacon's positive claims for science aimed to destroy the dominance of Christianity Descartes continued Bacon's radical program while providing it with the mathematical physics required for its success Far from being solely an epistemological and metaphysical thinker says Lampert Descartes was a master writer whose comic ridicule helped bring down the Church to which he paid lip service Both Bacon and Descartes used the Platonic art of dissimulation to achieve their ends by making their revolutionary aims appear compatible with Christianity Once we recognize Bacon and Descartes as legislators of modern times in a specifically Nietzschean sense we can also see Nietzsche in a new way as the first thinker to have understood modern times and transcended it in a postmodern worldview According to Lampert Nietzsche provides a new foundation for culture a joyous science that reveals the grandeur and purposeless play of the cosmic whole and yet avoids enervating despair or destructive dogmatic belief

The Story of Philosophy Will Durant, 1926 A brilliant and concise account of the lives and ideas of the great philosophers Plato Aristotle Bacon Spinoza Voltaire Kant Schopenhauer Spencer Nietzsche Bergson Croce Russell Santayana James and Dewey The Story of Philosophy is one of the great books of our time The Story of Philosophy is a key book for any reader who wishes to survey the history and development of philosophical ideas in the Western world

Understanding Merleau-Ponty, Understanding Modernism Ariane Mildenberg, 2018-12-13 Understanding Merleau Ponty Understanding Modernism brings into dialogue Maurice Merleau Ponty's phenomenology with modernist art literature music film and neurophysiological discoveries opening up the complexities of the philosopher's phenomenology of perception to a broader audience across the arts An important resource for anyone interested in the links between modernism and philosophy Understanding Merleau Ponty Understanding Modernism offers close readings of Merleau Ponty's key texts explores modernist works in light of his thought and provides an extended glossary of Merleau Ponty's central terms and concepts
