    New Visions of Collaborative Writing Janis Forman,1992   **Nonacademic Writing** Ann Hill Duin,Craig J. Hansen,2013-11-05 In this volume methodological cultural technological and political boundaries felt by writers are analyzed translated and challenged in a way that will appeal to researchers theorists graduate students instructors and managerial audiences Instead of extracting rules from previous research the contributors working from multidisciplinary perspectives describe and analyze the social and technological contexts surrounding nonacademic writing Their essays present a formative rather than summative outlook toward future research on nonacademic writing Collectively these chapters articulate a unique perspective toward nonacademic writing that considers The centrality of emerging communications technologies in nonacademic writing research and the need for a socio technological perspective New technologies reshape the concept of text and significantly impact the writing process and written products in nonacademic settings The relationship between the academy and the workplace A number of chapters challenge us sometimes from opposing perspectives to scrutinize our role as writing educators in preparing students for the workplace Should we support the interests of corporate employers or should we resist those interests Should we enculturate students in workplace writing practices by placing them in these environments or should we examine the tacit knowledge gained by workplace professionals and deliver this via classroom instruction New theory new research agendas Contributors from diverse fields offer new theoretical lenses or use established lenses in innovative ways expanding the agenda for nonacademic writing research This volume represents the vision the social landscape demands for research and pedagogy in nonacademic writing

Theorizing Composition Mary Kennedy,1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory s critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works **The Meaning of Collaborative Writing in a College Composition Course** Mara Casey,1992

Collaborative Writing Bruce W. Speck,1999-07-30 Collaborative writing has attracted much attention in the last 25 years though it eludes clear definition In its simplest sense it is writing done by more than one person But in a broader sense even a work by one author involves collaboration The author typically builds on the work of others and revises the writing in response to feedback This feedback can come from a student s peers or teacher in a classroom setting it can come from experts and editors who assess a scholar s writing or it can come from colleagues and clients in the world of business This bibliography is a guide to research on collaborative writing published from the early 1970s to 1997 Included are nearly 1000 annotated entries for books articles reports bibliographies and other materials These entries are clustered in two broad parts each of which contains numerous topical sections The first part of the book is devoted to collaborative writing in academic settings and covers such topics as classroom issues peer review and tutoring the role of computers and technology particular types of classes and ethical and gender concerns The second looks at collaborative writing in nonacademic settings Included are works on corporate acculturation group dynamics policies and procedures industry university collaboration and technical reports Entries are arranged alphabetically in each section and detailed author and subject indexes provide easy access to the material Strategies & Resources for Teaching Writing with the Simon & Schuster Quick Access Reference for Writers 4/E Linda Julian,Patricia Kelvin,Scott A. Collaborative Writing: Issues and Recommendations Bruce W. Speck,2002-05-07 Collaboration is interwoven in the writing process in both obvious and subtle ways from a writer using the language that he or she inherited to referring to the works of other writers both explicitly and implicitly to writing together with a colleague In this book the author explains that collaborative writing can be a useful pedagogical tool professors can use to help students actively learn about the subject matter and about themselves **Collaborative Writing in Composition Studies** Sheryl I.
