New Modes Of Governance In The Global System:

New Modes of Governance in the Global System M. Koenig-Archibugi, M. Zürn, 2005-11-30 Globalization processes are propelling a transformation of governance As political problems become more transnational public as well as private actors increasingly perform governance activities beyond the level of individual states This book examines the wide variety of forms that governance can take in the global system and their consequences An overarching analytical framework is applied to global institutions and initiatives in areas such as trade liberalization financial market regulation privacy protection cybercrime and food safety Quality and Legitimacy of Global Governance T. Cadman, 2011-02-08 As the international community struggles with major issues such as deforestation it is increasingly turning to sustainable development and market based mechanisms to tackle environmental problems Focusing on forestry this book investigates the legitimacy of global forums and evaluates the quality of global governance in the current era *Rethinking Authority in Global Climate Governance* Thomas Hickmann, 2015-10-16 In the past few years numerous authors have highlighted the emergence of transnational climate initiatives such as city networks private certification schemes and business self regulation in the policy domain of climate change While these transnational governance arrangements can surely contribute to solving the problem of climate change their development by different types of sub and non state actors does not imply a weakening of the intergovernmental level On the contrary many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements Rethinking Authority in Global Climate Governance puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states Thus this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change UNFCCC and underscores that multilateral treaty making continues to be more important than many scholars and policy makers suppose This book will be of great interest to students and scholars of global environmental politics climate change and sustainable development The Oxford Handbook of Regulation Robert Baldwin, Martin Cave, Martin Lodge, 2012-07-19 Regulation is often thought of as an activity that restricts behaviour and prevents the occurrence of certain undesirable activities but the influence of regulation can also be enabling or facilitative as when a market could potentially be chaotic if uncontrolled This Handbook provides a clear and authoritative discussion of the major trends and issues in regulation over the last thirty years together with an outline of prospective developments It brings together contributions from leading scholars from a range of disciplines and countries Each chapter offers a broad overview of key current issues and provides an analysis of different perspectives on those issues Experiences in different jurisdictions and insights from various disciplines are drawn upon and particular attention is paid to the challenges that are encountered when specific approaches are applied in practice Contributors develop their own

distinctive arguments relating to the central issues in regulation and apply scholarly rigour and clear writing to matters of high policy relevance The essays are original accessible and agenda setting and the Handbook will be essential reading both to students and researchers and to with regulatory and regulated professionals Global Governance on Renewable Energy Sybille Roehrkasten,2015-06-17 Comparing Germany s and Brazil s government perspectives Sybille Roehrkasten reveals that the ideas on global renewable energy governance are highly contested In her study the author sheds light on the politics behind the definition of global governance issues focusing on two pioneers in the worldwide promotion of renewables and two decisive players in this emergent area of global cooperation She demonstrates that ideas about problems and solutions in transboundary policy making differ widely and that these differences are caused by the decision makers policy contexts and self interests The differences concern key aspects in global governance on renewables such as global challenges to be addressed favored renewables options barriers to renewables promotion and tasks for cooperation **A Research Agenda**
