**Maria Sibylla Merian** Maria Sibylla Merian,1999 [Women and the Art and Science of Collecting in Eighteenth-Century Europe](#) Arlene Leis,Kacie L. Wills,2020-08-31 Through both longer essays and shorter case studies this book examines the relationship of European women from various countries and backgrounds to collecting in order to explore the social practices and material and visual cultures of collecting in eighteenth century Europe It recovers their lives and examines their interests their methodologies and their collections and objects some of which have rarely been studied before The book also considers women s role as producers that is creators of objects that were collected Detailed examination of the artefacts both visually and in relation to their historical contexts exposes new ways of thinking about collecting in relation to the arts and sciences in eighteenth century Europe The book is interdisciplinary in its makeup and brings together scholars from a wide range of fields It will be of interest to those working in art history material and visual culture history of collecting history of science literary studies women s studies gender studies and art conservation

**Maria Sibylla Merian** Catherine Powell-Warren,2025-09-09 This captivating study of the life and career of Maria Sibylla Merian focuses on her artistic output and accomplishments The career and achievements of Maria Sibylla Merian 1647 1717 are well documented A pioneering artist and scientist she spent much of her life innovating across various mediums and disciplines Her curiosity was so strong that it led her on a journey across the Atlantic Ocean from Europe to South America in pursuit of knowledge While her status as an entomologist and naturalist has garnered the most attention Merian has not yet received her full due as an artist Raised by a family of illustrators and publishers she learned how to draw mix paints create prints and paint in watercolor from her stepfather still life expert Jacob Marrel Her stepfather s attention and tutelage would provide the foundation for her talents to flourish and teach her that her gender was not a barrier to success In Maria Sibylla Merian author Catherine Powell Warren examines Merian through an art historical lens to better understand her life as a woman and illustrator in the early modern Dutch Republic This volume highlights Merian s artistic range financial successes and historical significance Considering the obstacles women artists faced in this period Merian s achievements namely her management of a successful artists studio and for profit workshop were extraordinary

**The Flowering of Ecology** Kay Etheridge,2020-11-04 The Flowering of Ecology presents an English translation of Maria Sibylla Merian s 1679 caterpillar book *Der Raupen wunderbare Verwandelung und sonderbare Blumen Nahrung* Her processes in making the book and an analysis of its scientific content are presented in a historical context Merian raised insects for five decades recording the food plants behavior and ecology of roughly 300 species Her most influential invention was an ecological composition in which the metamorphic cycles of insects usually moths and butterflies were arrayed around plants that served as food for the caterpillars Kay Etheridge analyzes the 1679 caterpillar book from the viewpoint of a biologist arguing that Merian s study of insect interactions with plants the first of its kind was a formative contribution to natural history Read Kay Etheridge s

blogpost on Art Herstory See inside the book **Early Professional Women in Northern Europe, c. 1650-1850** Johanna Ilmakunnas, Marjatta Rahikainen, Kirsi Vainio-Korhonen, 2017-07-06 This book focuses on early examples of women who may be said to have anticipated in one way or another modern professional and or career oriented women. The contributors to the book discuss women who may at least in some respect be seen as professionally ambitious unlike the great majority of working women in the past. In order to improve their positions or to find better business opportunities the women discussed in this book invested in developing their qualifications and professional skills took economic or other kinds of risks or moved to other countries. Socially they range from elite women to women of middle class and lower middle class origin. In terms of theory the book brings fresh insights into issues that have been long discussed in the field of women's history and are also debated today. However despite its focus on women the book is conceptually not so much focused on gender as it is on profession business career qualifications skills and work. By applying such concepts to analyzing women's endeavours the book aims at challenging the conventional ideas about them. **Maria Sibylla Merian**, 1999 [Neues Blumenbuch](#) Maria Sibylla Merian, Thomas Bürger, 1999 **Maria Sibylla Merian, 1647-1717** Maria Sibylla Merian, 1998 Artwork by Maria Sibylla Merian

**Maria Sibylla Merian & Daughters** Ella Reitsma, 2008 In the 17th century when insects were called beasts of the devil and women were virtually excluded from the field of science a young German woman named Maria Sibylla Merian 1647-1717 dedicated her life to the study and depiction of the metamorphosis of insects. Merian's extraordinary accomplishments in art and science and those of her most important pupils her daughters Johanna Helena and Dorothea Maria will be on view in **Maria Sibylla Merian Daughters Women of Art and Science** at the J Paul Getty Museum the Getty Center June 10 August 31 2008 the first major exhibition of Merian's work in America. The exhibition will explore various aspects of Merian's career including her hand colored publications on flowers and insects her successful business venture in Amsterdam as a specimen supplier for the collectors and naturalists and her extraordinary journey to Suriname and the scientific discoveries that resulted. Specimens of actual insects including the large Blue Morpho butterfly will be included in the exhibition alongside Merian's renderings providing a rare opportunity for scholars nature lovers and families to experience European and exotic insects first hand. [Quarterly News-letter - Book Club of California](#) Book Club of California, 2007 [Women, Art, and Society](#) Whitney Chadwick, 2007 A wave of new scholarship floods her text. Chadwick opens up whole new ways of thinking about familiar images. **Women's Art Journal** **Sensations** Nadine Olonetzky, 2007 The history of European landscape design has its beginnings in the early cultures of the Mediterranean. Again and again especially during the Renaissance ancient parks and gardens have been imitated as archetypes. The park is still a site of design activity today human beings use living material to

create an artificial landscape a paradise This book not only recounts the history of the garden it conjures it up before the reader's eyes from the Garden of Eden and the Hanging Gardens of Nebuchadnezzar to the first book on botany and the gardens of the Renaissance from the invention of the lawnmower to the land art movement in the United States Hengende Gärten II Hanging Gardens II at the Hanover Expo by the Dutch architectural firm MVRDV and the Gazebo Berg Gazebo Mountain of the Swiss artist couple Studer van den Berg at the 2005 world's fair in Japan Every single station of this journey through gardens and time is illustrated by an entire double page with pointedly written texts and an abundance of historical and contemporary images

Today women are actively participating in science while the number of women among the world's top scientists is growing In fact the face of modern science would be unrecognisable without the major contributions made by women Women still face a lot of obstacles in science which can be summed up using metaphors such as the glass ceiling the sticky floor and the glass cliff The role of women in research excellence is still an issue as well as their low numbers in top positions That is why policy changes are needed to tap women's talents and resources to the full For much of history women were officially excluded from the scientific realm Moreover they often encountered loving parents who tried to discourage their passions for unfeminine subjects such as geology or mathematics The lucky few had fathers mothers husbands or distant admirers who encouraged their scientific ambitions This volume shows that despite the invisibility of women in the historical narrative of mainstream science it does not mean that science was always exclusively a man's world Throughout the centuries many women managed to overcome their marginalisation and excel in their chosen field making vital additions to the sum of human knowledge This book tells the compelling stories of these heroines of European science some sung but many unsung and through their narratives it enriches and completes the history of human knowledge by highlighting the role of women
