## **Ideas Language Learning:**

**Ideas and Options in English for Specific Purposes** Helen Basturkmen, 2014-03-14 This volume presents a range of views about language learning and teaching in English for Specific Purposes ESP. Its purpose is to go beyond individual cases and practices to examine the approaches and ideas on which they are based. The aim is for readers to adopt an analytical stance toward the field and to identify current perspectives in ESP and the ideas driving them. *Ideas and Options in English for Specific Purposes* does not promote any one approach but rather identifies and illustrates those in evidence today. The main emphasis is on the links between theory and ESP teaching and research. Ideas from linguistics, sociolinguistics, education, SLA and social theories are described. Links are then made between these ideas and ESP course designs, instructional materials and research projects. Thus the book moves back and forth between descriptions of theories, teaching practice and research. Part I introduces the book's approach to description of ESP and the framework used to investigate it. Part II examines ideas of language learning and teaching in ESP. Recognizing that ESP is taught in many different countries and contexts, the author draws on a wide range of examples of teaching practice and research from around the world and from different branches of ESP including English for Academic Purposes, English for Professional Purposes and English for Vocational Purposes. From Chapter 3 onward, each chapter includes Questions for Discussion and Projects to encourage readers to research and analyze the practices of ESP in their own contexts and to consider the ideas they draw on in their own teaching. This text is geared toward graduate-level TESOL education courses. *Second Language Learning and Language Teaching* Vivian Cook, 2016-05-05 *Second Language Learning and Language Teaching* provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language such as grammar, vocabulary, pronunciation and the writing system and the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context, the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching. **Computer-Supported Collaborative Chinese Second Language Learning** Yun Wen, 2019-09-25 This book explores the implementation of an online representational tool, GroupScribbles, in Chinese as a second language classrooms from primary school to secondary school. It demonstrates the effectiveness of combining online representational tools with face-to-face classroom learning and provides a workable approach to analysing interactions interweaving social and cognitive dimensions which take place in the networked classroom. A series of suggestions regarding networked second language learning will help educators effectively implement information and communication technology tools in the classroom.

Multiliteracies, Multimodality, and Learning by Design in Second Language Learning and Teacher Education Agustín Reyes-Torres, María Estela Brisk, Manel Lacorte, 2025-04-30 Multiliteracies Multimodality and Learning by Design in Second Language Learning and Teacher Education offers valuable insights and practical strategies for addressing the language and literacy needs of students in diverse multilingual classrooms This edited volume delves into the dynamic interplay between multimodality multiliteracies and Learning by Design LbyD providing evidence based research and actionable guidance for their effective implementation in second language learning and teacher education Examining the advantages of incorporating multimodality and multiliteracies in second language teacher training this book emphasizes the use of multimodal texts to create engaging and meaningful lessons for L2 learners By empowering students as active co constructors of knowledge this book equips educators with the necessary tools to foster a vibrant and inclusive learning environment Designed specifically for pre service and practicing teachers this book serves as an indispensable resource for integrating the pedagogy of multiliteracies into both coursework and classroom practices
